S2 The design of a rough mill for the production of interior furniture parts is used to illustrate a simulation technique for analyzing and evaluating established and proposed sequential production systems Distributions representing the real world random characteristics of lumber equipment feed speeds and delay times are programmed into the simulation An example is given of how bottlenecks are found and removed in order to design on paper a layout that will meet a set of goals before a single piece of equipment has been purchased GPSS a General Purpose Simulation System language was used S3 Philip Johnson Franz Schulze, 1996-06-15 In this critically acclaimed biography Franz Schulze probes the private and professional life of one of the most famous architects and architectural critics of the twentieth century The only child of a wealthy Midwestern family Philip Johnson was a millionaire by the time he graduated from Harvard and in 1932 he helped stage the historic International Style exhibition at the Museum of Modern Art A patron of the arts and a political activists who flirted with the politics of Hitler Huey Long and Father Coughlin he went on to create controversial and historical structures such as the Glass House the Roofless Church the AT T Building the Crystal Cathedral and many more Johnson s personal charms paired with his manipulative ploys like his borrowing of designs shine through in this biography Drawing on Johnson s correspondence personal photographs and speeches and on interviews with his friends and contemporaries Schulze fills the biography with fascinating information on the architect s family travels friends and lovers and his many buildings and spaces themselves Franz Schulze is a professor of art at Lake Forest College He is the author of *Fantastic Images Chicago Art since 1945 One Hundred Years of Chicago Architecture* and *Mies van der Rohe A Critical Biography* *The Bible Manual* Christian Gottlob Barth, 1865 *Catalog of Aeronautical and Allied Technical Documents* United States. use of a technology can be a crucial factor in the eventual modification and improvement of that technology examples considered include the introduction of the telephone into rural America and the influence of non users of the Internet The essays in part II look at advocacy groups and the many kinds of users they represent particularly in the context of health care and clinical testing The essays in part III examine the role of users in different phases of the design testing and selling of technology Included here is an enlightening account of one company s design process for men s and women s shavers which resulted in a Ladyshave for users assumed to be technophobes Taken together the essays in How Users Matter show that any understanding of users must take into consideration the multiplicity of roles they play and that the conventional distinction between users and producers is largely artificial *The Lamp* [ed. by T.E.
