Emerging Issues in Sustainable Development Mitsuo Matsushita, Thomas J. Schoenbaum, 2016-10-05 This book seeks to answer the questions how do the rules of international treaties on trade and investment apply to the new laws and policies relating to energy related trade and do the rules of the multilateral system contribute to or detract from sustainable development An emerging set of new problems in the law of international trade is how to reconcile the rules of the multilateral trading system with shortages of certain natural resources and the necessity to develop renewable energy resources The chapters in this book provide a comprehensive analysis of the international trade issues presented by national trade laws and policies with regard to natural resources and energy This book is about the extent to which we are interpreting existing rules to cover emerging problems and how the rules of the multilateral trading system can be adapted

to achieve sustainable development in natural resources and energy The book begins with a survey of selected national laws relating to recent restrictions on the export of natural resources both resources used to produce energy as well as natural resources essential for industrial production After examining the range of such laws in selected important countries we turn to the application of the rules of the multilateral trading system to such export restrictions We discuss the major rules of the World Trade Organization WTO as well as the natural resources rules in selected regional preferential free trade agreements While there is not a comprehensive global legal regime on competition law we believe it is also important to examine how selected national competition laws impact export restrictions on natural resources This book will be a major contribution to the international dialogue on international economic law issues with respect to trade in natural resources and energy

Marketing Management, 3rd Edition Kumar Arun & Meenakshi N., In today's socially networked and highly competitive world it is imperative that marketers are always truthful because customers eventually find out if they have been misled. This can lead to their angst with the company going viral, thereby destroying the company's reputation. Marketing Management advocates marketing based on absolute truth. Also, brand image is sensitive to market sentiments. Brands can be in danger: one wrong product or one shoddy campaign can destroy a brand built over years. Companies must align everything that they do with the core spirit of their brands. Further, when everything seems to go digital, it is important that marketers keep in mind that customers are primarily interested in their products/services. The book advocates that superior products and services will always be central to marketing. Key Features: Best Practices Researched, implemented and result driven practices taken from leading companies across diverse industries throughout the world. Marketers can adopt these practices to elevate individual and organizational performance. Corporate Insights: Examples of marketing concepts being implemented by well-known Indian companies and brands. Latest moves of companies and brands as they cope with competition and environment. Case Studies: A brief case study after each chapter focusing on specific issues dealt within the chapter. Specialized Questions: Questions meant to make students ponder upon various aspects of marketing and challenge the existing paradigms.
