

# I Telephone Functions

 Press **☰** and **☰** to print an overview of the telephone book functions.

How to connect additional telephones and what functions are available to you can be found in the section on telephone lines and additional devices, page 20.

## Making Telephone Calls on the Machine

Dial the desired telephone number. There are multiple ways to do this. Then lift up the handset.

 You can also lift up the receiver first, then dial a number. The dialling process starts immediately.

**Manual dialling:** Dial the desired telephone number with the number pad.

### Telephone books

- 1 Press **☰☰**.

 You can also load telephone book entries by pressing **OK**, **☰☰** and **OK**.

- 2 Use **▲▼** to select an entry. Enter the initial letters with the number buttons to navigate more quickly in the telephone book.

 You can save an entry multiple times with the same name but in a different category. In the telephone book, the first letter of the category appears after the entry.

**Short dial:** Press **☰☰**. Select the desired entry with **▲▼** or the number button.

 You can also load short dial entries by holding the respective number button pressed (for at least two seconds).

**Redial list:** Press **☰☰**. Use **▲▼** to select an entry from the list of dialled numbers.

 You can also load the redial list by pressing **OK**, **☰☰** and **OK**.

**Caller list:** Hold **☰☰** pressed (for at least two seconds). Use the **▲▼** to select an entry from the list of callers.

 You can also load the caller list by pressing **OK**, **☰☰** and **OK**.

 For this function to work, the caller line identification (CLIP) must be activated for your telephone connection (country and network dependent). The number and name will not be shown if the caller suppresses his number.

## Chain Dialling

You can combine and edit manually entered digits and saved entries, before the dialling process starts. If you have saved, for example, the telephone number prefix of an inexpensive telephone service provider (call-by-call) as a telephone book entry, select this entry and manually enter the subsequent telephone number or select another saved entry.

## Inserting a Dialling Pause

It can be necessary to insert a dialling pause into the telephone number, for instance for the outside line access code, for an extension or sub-address or in a long distance number. Press **R**. The second part of the number is only dialled once the connection with the main number has been established.

## Telephone Book of the Machine

In the telephone book of your machine, you can save entries with multiple numbers and collect multiple entries into groups. You can assign various ring tones to the entries. Observe the information in the technical data.

 You can move the cursor using **▲▼**. Use **C** to delete individual digits. Press **STOP** to close the menu and to return to the starting mode.

### Saving Entries

- 1 Press and hold **☰☰** (at least two seconds).

 You can also load the function by pressing **OK**, **☰☰** and **OK**.

- 2 Enter the name. You can enter characters using the numeric keys (see button labels) Press **☰** to enter special characters. Press the respective key several times until the desired character or special character appears on the display.

- 3 Confirm using **OK**.

- 4 Using **▲▼**, select the category for which you would like to enter a number: CATEGORY1 HOME CATEGORY1 WORK CATEGORY1 MOBILE or CATEGORY1 FAX.

- 5 Confirm using **OK**.

- 6 Enter the telephone number.

- 7 Confirm using **OK**.

- 8 You can assign a ring tone to the number. Using the numeric keys from **☰** to **☰**, select a ringtone. Using **▲▼** you can set the volume.

- 9 Confirm using **OK**. The entry is saved.

*Multimedia Applications, Services and Techniques - ECMAST'99* Helmut Leopold, Narciso Garcia, 2003-06-26 The liberalisation in the telecommunication market and thus the advent of competition has had a tremendous impact on business in this area. New operators have started to offer telecommunication services in competition with the classical national network operators. This in turn will have an impact on the market share, the tariff structure, the Quality of Service (QoS) and the services offered to the end customers. A way to maintain or increase revenue for network operators is to additionally offer new services to the customers. The final target is a so-called Full Service Network (FSN) which is capable of offering all types of bi-directional multimedia services. The provisioning of new telecommunication services in general and new multimedia services in particular is made possible by the availability of several new technologies, as well as through advances in standardisation. R & D policies world-wide but especially in Europe have forced the development of new networking technologies such as ATM, xDSL and HFC, as well as new video technologies as defined by DVB and DAVIC.
