Who Are We? Old, New, and Timeless Answers from Core Texts Robert D. Anderson,Molly Brigid Flynn,Scott J. Lee,2011-05-04 In this volume the Association for Core Texts and Courses has gathered essays of literary and philosophical accounts that explain who we are simply as persons Further essays are included that highlight the person as entwined with other persons and examine who we are in light of communal ties The essays reflect both the Western experience of democracy and how community informs who we are more generally Our historical position in a modern or post modern urbanized or disenchanted world is explored by yet other papers And finally ACTC educators model the intellectual life for students and colleagues by showing how to read texts carefully and with sophistication as an example of who we can be

Charting Reform, Achieving Equity in a Diverse Nation Gail L. Sunderman,2013-05-01 This book examines what equity means in a nation where the schools are becoming more diverse The authors consider how well our educational reform policies often framed in the language of equity and opportunity measure up to the challenges of achieving equity in a diverse nation While there is growing awareness of the increasing racial ethnic and socioeconomic diversity of the nation there is little recognition of how these trends affect the schools particularly in formerly homogeneous communities At the same time inequalities in student achievement between different racial ethnic and socioeconomic groups persist even as educational policy has intensified the focus on the achievement gap These two challenges make definitions of equity and opportunity as urban problems obsolete and call for a critical examination of educational policy and reform from an equity

perspective Central themes include the critical examination of how equity is conceived under the law and in policy the experiences of minority students in suburban schools and the impact of current reform policies and strategies for achieving greater educational opportunities for all students This book is designed for graduate and undergraduate courses in educational policy and policy analysis for policymakers interested in a critical examination of current reform policies and options and educational leaders and administrators struggling with the implementation of reform mandates From a policy perspective it includes a survey of the evolution of educational policies and reforms since the 1960s and traces the mix of legal and legislative legacies that have informed educational policy and equity It describes how trends in suburban diversification affect the schools something that has largely escaped the attention of educational reformers It provides school based and non school based remedies for achieving equity in diversifying suburban communities and articulates alternatives to the current accountability for performance approach It offers new and innovative analyses of current approaches to school reform including an analysis of how accountability tests can create the illusion of reducing the achievement gap and an examination of the paradoxes of federally funded compensatory policies that incorporate market based strategies Novel approaches such as social emotional learning and placed based college access strategies are examined through an equity lens

The Concept of Woman Prudence Allen, 2006-01-26 The culmination of a lifetime s scholarly work this study by Sister Prudence Allen traces the concept of woman in relation to man in Western thought from ancient times to

the present This volume is the second in her study in which she explores claims about sex and gender identity in the works of over fifty philosophers both men and women in the late medieval and early Renaissance periods Social Structuration in Tibetan Society Jia Luo,2016-12-20 This volume is unique in the literature concerning both the sociology of education and Tibetan society It aims to propose a Tibetan sociology of education something that no other author has attempted as well as to provide insights into the nature of Tibetan society both historically and currently through the application of Giddens structuration theory supplemented by the work of ancient Tibetan philosopher Je TsongKhapa Previous Western accounts of Tibetan history and society have lacked insider perspectives as well as access to original documentation in the Tibetan language The author of this volume is Tibetan and does not experience these limitations He has also taught sociology at the university level and in 1999 published a general textbook on sociology in Tibetan which attempted to draw on Western theories and apply them to the Tibetan context In short the author appears to be highly credible in taking on this extremely ambitious project *Research in Education* ,1974 **Thomas Shields and the Renewal of Catholic Education** Leonardo Franchi,Mary Pat Donoghue,2023-05-26 This book explores the contribution of the Rev Dr Thomas Shields 1862 1921 to Catholic education in the United States of America in the late 19th and early 20th century Fr Shields was a pioneer in combining a career as an academic in Catholic University of America with the publication of many resources for schools Given his pioneering role in aligning Catholic educational thought with emerging insights in the sciences and his multi layered commitment to Catholic education as scholar author of textbooks and founder of initiatives in the field of Teacher Education it seems fitting that his considerable body of work should be the subject of fresh scholarly investigation The book is in five parts Part 1 Catholicism as an Educational Movement sets out the contours of the intellectual climate in which Shields operated and presents Catholicism as a dynamic educational movement Part 2 Responding to Progressive Thought explores the relationship between Progressivism and Catholic Education showing how the Catholic Church responded to the challenges presented by Progressive thought Part 3 Shields and the Reform of Pedagogy examines both Shields general pedagogical principles and how they relate to Catholic education Part 4 Forming Teachers in Heart and Mind considers Shields ideas on Catholic Teacher Formation exploring issues such as culture vocation method and curriculum Part 5 The Catholic Education Series explores selected examples from Shields Catholic Education Series to identify how his material for schools reflected to a greater or lesser extent his wider educational ideas As the present age is also witness to considerable and deep rooted challenges to Catholic education and indeed to the Catholic understanding of the human person Shields work will inspire contemporary reform minded Catholic educators to reassess and develop the mission of Catholic education in light of the traditions of the Church
