Trading with the Enemy Hugo Meijer, 2016-02-02 In light of the intertwining logics of military competition and economic interdependence at play in US China relations *Trading with the Enemy* examines how the United States has balanced its potentially conflicting national security and economic interests in its relationship with the People's Republic of China PRC To do so Hugo Meijer investigates a strategically sensitive yet under explored facet of US China relations the making of American export control policy on military related technology transfers to China since 1979 *Trading with the Enemy* is the first monograph on this dimension of the US China relationship in the post Cold War Based on 199 interviews declassified documents and diplomatic cables leaked by Wikileaks two major findings emerge from this book First the US is no longer able to apply a strategy of military technology containment of China in the same way it did with the Soviet Union during the Cold War This is because of the erosion of its capacity to restrict the transfer of military related technology to the PRC Secondly a growing number of actors in Washington have reassessed the nexus between national security and economic interests at stake in the US China relationship by moving beyond the Cold War trade off between the two in order to maintain American military preeminence vis vis its strategic rivals By focusing on how states manage the heterogeneous and potentially competing security and economic interests at stake in a bilateral relationship this book seeks to shed light on the evolving character of interstate rivalry in a globalized economy where rivals in the military realm are also economically interdependent

Local Redistribution and Local Democracy Clayton P. Gillette, 2011-06-28 The traditional theory of urban finance argues against local redistribution of wealth on the assumption that such action is likely to chase away the relatively wealthy leaving only the impoverished behind Nevertheless Clayton P Gillette observes local governments engage in substantial redistribution both to the wealthy and to the poor In this thoughtful book Gillette examines whether recent campaigns to enact living wage ordinances and other local redistributive programs represent gaps in the traditional theory or political opportunism He then investigates the role of the courts in distinguishing between these explanations The author argues that courts have greater capacity to review local programs than is typically assumed He concludes that when a single interest group dominates the political process judicial intervention to determine a program's legal validity may be appropriate But if the political contest involves competing groups courts should defer to local political judgments
