still far off in the future But by 2020 the auto industry will look very different from today's field of troubled auto giants The combination of technological breakthroughs and charging networks driven by global warming and peak oil makes it clear that revolutionary change in the auto industry is happening right now In *High Voltage* Jim Motavalli captures this period of unprecedented change documenting the evolution from internal combustion engines to electric power Driven by the auto world's ambitious and sometimes outlandish personalities the book chronicles the race to dominate the market focusing on big players like Tesla and Fisker as well as a tiny start up and a battery supplier Flashing forward to the changes we'll see in the coming years *High Voltage* shows a not so distant future where we will live on a smart grid our cars fueling that is charging while we shop or sleep The ramifications of these changes will be on a grander scale than most of us ever imagined altering foreign policy reducing trade deficits and perhaps even ending global warming
