firm strategies and tactics examined variously from the perspective of multinational firms entering these new markets from the viewpoint of existing local firms facing new competitive challenges from global entrants and from the perspective of local firms seeking to establish themselves in foreign markets where they have not previously competed Most of the individual chapters are revised versions of papers originally presented at a conference sponsored by the William Davidson Institute which focuses on research related to emerging and transitional economies and have not previously appeared in published form Thus the book is a unique collection of cutting edge scholarship on the various aspects of marketing in transitional economies It will prove valuable reading to academics policymakers and international business strategists *The Customer Experience Model* Adyl Aliekperov,2020-10-01 For any company defining the most efficient marketing concept to create a competitive customer experience CX is vital for sustained development The focus of this research is the creation of a comprehensible practical approach to the development of client experience the Customer Experience Model CXM The practical application of the CX model will allow companies to create value for their customers and key stakeholders thus generating the necessary profit and building conditions for further development Balancing academic research and real world applications The Customer Experience Model provides a framework that readers can understand and utilize to implement improvements in a company In this work the readers also will learn about application in customer experience formation of such concepts as systems thinking learning organization Lewinian Experiential learning cycle The role of a leader in the formation of an effective customer experience will be shown as well Also the readers will get an obvious idea of how to plan customer experience and measure its effectiveness The Customer Experience Model shows the latest state of knowledge on the topic and will be of interest both to students of business schools and universities at an advanced level academics and reflective practitioners in the fields of leadership organizational studies marketing and strategic management and consulting
