For both student food scientists and experienced professionals, a knowledge of U.S. food law is the foundation that supports an understanding of all industry regulation. Based on a popular internet course, [Guide to Food Laws and Regulations](#) 2nd Edition informs students on the significance, range, and background of food laws and gives tools for finding current regulations. This compact resource outlines major U.S. food laws, factors that led to their passage, and explains the role of key agencies like the FDA and FSIS in regulation and enforcement. Students are directed to internet sites as well as to indexes and resources available from the Federal government. Other topics include religious dietary law, Occupational Safety and Health Administration regulations, environmental regulations, HACCP and GMPs, laws governing health claims, and the regulation of biotechnology. New to this edition are six chapters on subjects that have risen to prominence during the last few years: Poultry Processing Regulations, Federal Trade Commission Animal Welfare Regulations, and Food Production Egg Laws and Regulations, Catfish Regulations, Locating Laws and Regulations. [Guide to Food Laws and Regulations](#) 2nd Edition is an ideal sourcebook for students and professionals in food science and technology, chemistry, biosystems engineering, food animal production, and medicine, agribusiness, and other closely related fields.

**Advances in Meat Processing Technology**. Alaa El-Din A. Bekhit, 2017-09-29. Meat is a unique biological material with a central importance in nutrition and health. [Advances in Meat Processing Technology](#) merges the expertise of meat scientists and food engineers in a holistic approach toward the processing of meat. The meat industry strives to deliver consistent high quality and safe meat products. Readers can benefit from knowledge generated by meat science researchers by achieving a greater understanding of the nature of meat and the engineering technology required for meat processing. This book comprises 17 full chapters that provide up-to-date and fundamental information on current topics in meat processing. This includes novel technologies such as the application of pulsed electric field, meat stretching and shaping, ultrasound, and high pressure. In addition, analytical techniques such as Raman spectroscopy and NMR are enabling considerable advancement of knowledge in meat science and in meat processing. Written by world-renowned experts in their fields, this contemporary collective work assembles the state of current knowledge that is of importance to both industry and academia.
