Leibniz on the Problem of Evil Paul Rateau,2019-05-01 Paul Rateau traces the genesis and development of G W Leibniz s treatment of the problem of evil from his earliest writings through the Essays on Theodicy 1710 By investigating Leibniz s early thinking about what evil is and where it comes from Rateau reveals the deeply original nature of Leibniz s later work and the challenges it raises Rateau explores the ways in which the Theodicy s theoretical project which integrates numerous disciplines and various argumentative strategies informs and is influenced by two more practical aims justifying the end of denominational divisions between Catholics and Protestants and inculcating true piety in believers By paying equal attention to both Leibniz s intellectual and personal development Rateau offers a holistic view of Leibniz s most profound and sophisticated work of philosophy Rateau shows how the young Leibniz moves from suggesting that the author of evil is God himself to later defending an original theory of necessitarianism in The Confession of a Philosopher which makes God the first link in the chain of beings that constitute the world but which ultimately denies God s responsibility for sin By examining Leibniz s theoretical development after 1673 he demonstrates how Leibniz comes to a revised framework that forms the basis for the project of theodicy After having examined the defensive and the doctrinal aspects of the Theodicy Rateau shows how human freedom can be reconciled with divine freedom in Leibniz s system Newly translated from the original French edition Rateau s book offers a novel and important new interpretation of Leibniz and will appeal to scholars both of Leibniz and of early modern thought generally

The Highest Good in Aristotle and Kant Joachim Aufderheide,Ralf M. Bader,2015 The notion of the highest good used to occupy a primary role in ethical theorising but has largely disappeared from the contemporary landscape The notion was central to both Aristotle s and Kant s ethical theories however a surprising observation given that their approaches to ethics are commonly conceived as being diametrically opposed The essays in this collection provide a comprehensive treatment of the highest good in Aristotle and Kant and show that even though there are important

differences in terms of content there are also important similarities in terms of the structural features of Aristotle's and Kant's value theories. By carefully analysing Aristotle's and Kant's theories of the highest good, a team of experts in the field shed light on their respective ethical theories and highlight the richness, complexity and fruitfulness of the notion of the highest good.

Nature and Necessity in Spinoza's Philosophy Don Garrett, 2018-08-02. Spinoza's guiding commitment to the thesis that nothing exists or occurs outside of the scope of nature and its necessary laws makes him one of the great seventeenth-century exemplars of both philosophical naturalism and explanatory rationalism. *Nature and Necessity in Spinoza's Philosophy* brings together for the first time eighteen of Don Garrett's articles on Spinoza's philosophy, ranging over the fields of metaphysics, epistemology, philosophy of mind, ethics, and political philosophy. Taken together, these influential articles provide a comprehensive interpretation of that philosophy, including Spinoza's theories of substance, thought and extension, causation, truth, knowledge, individuation, representation, consciousness, conatus, teleology, emotion, freedom, responsibility, virtue, contract, the state, and eternity, and the deep interrelations among them. Each article aims to resolve significant problems in the understanding of Spinoza's philosophy in such a way as to make evident both his reasons for his views and the enduring value of his ideas. At the same time, Garrett's articles elucidate the relations between his philosophy and those of predecessors and contemporaries like Aristotle, Hobbes, Descartes, Locke, and Leibniz. Lastly, the volume offers important and substantial replies to leading critics on four crucial topics: the necessary existence of God, Nature, substance, monism, necessitarianism, and consciousness.
