new approaches and interpretation of tourism to effectively respond to the human societal social and climate challenges This book offers a novel and original perspective entailing the application of a humanistic management approach to sustainable tourism which is centered on the value of human life the protection of human dignity and the promotion of well being Multiple theoretical approaches methods and practical cases on an international scale shed light on shared value creation and human dignity as a necessary condition for its achievement in different contexts Implicitly and explicitly they respond to the current urgency to implement strategies to recover from the worldwide impact of the pandemic crisis and to provide a vision of what tourism could and should be when it recovers It will be of interest to researchers academics professionals and postgraduates in the fields of management sustainability and tourism development **Asian Economic Integration**
