It includes anatomy kinesiology exercise physiology and nutrition the application and theory of cardiovascular flexibility and muscular training techniques and the fundamentals of health screening motivational techniques and program development. Special attention has been given to injury prevention emergency techniques and the legal issues confronting today's professionals The Entrepreneur's Guide to Personal Training IDEA Health & Fitness,2003 *The LA Fitness Personal Training Journal & Logbook* Jack Reegan,Stephanie Bowen,2016-01-31 What is The LA Fitness Personal Training Journal and Logbook all about We have created a better Personal Training Journal and Logbook for both trainers and clients of LA Fitness Personal Training Programs This will not only be a teach tool and educational aide but also valuable in recording which exercises a client has performed as they strive to reach their personal fitness goals It tracks all of your workouts and has weekly and monthly measurements so you can track all your progress Losing fat and building muscle plain and simple One concept that many people seem to have a problem with is the idea that in order to keep fat off of your body you need to put on muscle While at first glance this may seem counterproductive gaining weight in order to lose weight it's all about metabolism Metabolism can be summed up as all of the chemical reactions that take place within an organism In terms of weight loss and fitness metabolism basically means all of those calories that your body burns throughout the day Your goal is to add lean tissue and in turn elevate our resting metabolic rate Muscle creates metabolism So how do we do that As we add lean muscle to our bodies the muscle will require more calories to survive Imagine adding a bunch of plug in space heaters into your apartment during the winter As we keep adding heaters the energy demands go up and our electric bill rises More heaters more heat Similarly as we keep adding lean muscle our body must use more calories to operate that new muscle Just like the space heaters More muscle more calories burned Now let's take it one step further and consider the future As we are adding lean muscle over the coming weeks and months your body will burn more and more at rest calories Let's look at our analogy of adding the heaters inside of our house There is a certain point where you have enough heaters going to keep you from getting cold and then you can set all of the heaters to their lowest setting and they will still keep your house warm no matter how cold it is outside We want enough lean muscle on our bodies so that the fat we have lost can't come back There is a tipping point when you are working out where you have developed enough lean tissue somewhere between 6 and 15 pounds that the fat you have lost can't come back because you're burning so many calories throughout the day Think of pounds of fat in terms of the calories they represent A single 1 pound of fat is roughly 3500 cal In general terms a pound of lean muscle will add an additional 20 to 30 cal per day to your metabolism That means if I were to put on 10 pounds of lean muscle I would be burning an extra 200 to 300 cal each and every day So if I have 10 pounds of fat to lose 35 000 cal that I need to put on enough muscle to compensate for that fat so that once it's gone I don't have to keep stressing about it A reasonable workout should burn

between 500 and 1 000 calories in a given day weight training plus cardio CrossFit extreme cardio etc If you are working out 3 to 4 days a week which you need to be you are burning an extra 3000 to 4000 cal per week That would burn a pound of fat each week No one should be afraid of lean muscle it doesn't take very much space Ten 10 pounds of lean muscle is not much bigger than a cantaloupe as far as how much space it takes up in your body volume Just 5 pounds of fat is roughly the size of an American football You're right that's fine gross But think of it like this you could put on 10 pounds of muscle and if you lost just 3 pounds of fat you would not be any bigger We will teach you how to do that in the following workouts So grab your water bottle get your towel and prepare to wage war on fat Let's get started
