Vale, Robert Vale**

## **Rawlinsons Construction Handbook 23:**

**The Management of Construction: A Project Lifecycle Approach** F. Lawrence Bennett, 2007-06-01 Management of Construction introduces all aspects of management practice to students and professionals based in the construction industry. It is also important for those involved in allied fields such as design project development and site monitoring and inspection. The book addresses each stage of the construction project from conception to completion giving a perspective on the whole life cycle often missing from textbooks. The author also balances engineering concerns with the human resource and personal aspects of construction management that are so important to the successful outcome of a project. **Sustainable Living:**

**the Role of Whole Life Costs and Values** Nalanie Mithraratne, Brenda Vale, Robert Vale, 2007-09-04 Achieving a sustainable building is not just a matter of design and construction; what happens once the building is occupied is absolutely critical. This book shows how the choices designers, developers and building users make impact on sustainability over the life span of the building. The authors show how a holistic approach considering costs, energy use, environmental impact, global warming potential as well as items which are usually disregarded such as finishes, furniture and appliances is needed to achieve best practice. *The Bookseller*, 1901 Vols for 1871-76, 1913-14 include an extra number. The Christmas bookseller separately paged and not included in the consecutive numbering of the regular series.

Howlett, John Littlewood, Chandima Ekanyake, Ljubo Vlacic, 2018-11-30. This book contains selected papers from SEB 18 the Tenth International Conference on Sustainability in Energy and Buildings which was organised by KES International and Griffith University and held in Gold Coast Australia in June 2018. SEB 18 invited contributions on a range of topics related to sustainable buildings and renewable energy and explored innovative topics regarding intelligent buildings and cities. Applicable areas included the sustainable design and of buildings, neighbourhoods and cities built and natural environment optimisation and modelling techniques, smart energy systems for smart cities, green information communications technology and a broad range of solar, wind, wave and other renewable energy topics. The aim of the conference was to bring together researchers and government and industry professionals to discuss the future of energy in buildings, neighbourhoods and cities from a theoretical, practical implementation and simulation perspective. In addition, SEB 18 offered an exciting opportunity to present, interact and learn about the latest research in Sustainability in Energy and Buildings. *Cost Engineering*, 1997. **Transactions on Engineering Technologies** Haeng Kon Kim, Sio-Iong Ao, Mahyar A.
