Razavi Rfic Solutions Manual:

Analysis and Design of Quadrature Oscillators Luis B. Oliveira, Jorge R. Fernandes, Igor M. Filanovsky, Chris J. M. Verhoeven, Manuel M. Silva, 2008-07-08 Modern RF receivers and transmitters require quadrature oscillators with accurate quadrature and low phase noise Existing literature is dedicated mainly to single oscillators and is strongly biased towards LC oscillators This book is devoted to quadrature oscillators and presents a detailed comparative study of LC and RC oscillators both at architectural and at circuit levels It is shown that in cross coupled RC oscillators both the quadrature error and phase noise are reduced whereas in LC oscillators the coupling decreases the quadrature error but increases the phase noise Thus quadrature RC oscillators can be a practical alternative to LC oscillators especially when area and cost are to be minimized The main topics of the book are cross coupled LC quasi sinusoidal oscillators cross coupled RC relaxation oscillators a quadrature RC oscillator mixer and integrator oscillators The effect of mismatches on the phase error and the phase noise are thoroughly investigated The book includes many experimental results obtained from different integrated circuit prototypes in the GHz range A structured design approach is followed a technology independent study with ideal blocks is performed initially and then the circuit level design is addressed This book can be used in advanced courses on RF circuit design In addition to post graduate students and lecturers this book will be of interest to design engineers and researchers in this area

Distributed CMOS Bidirectional Amplifiers Ziad El-Khatib, Leonard MacEachern, Samy A. Mahmoud, 2012-05-02 This book describes methods to design distributed amplifiers useful for performing circuit functions such as duplexing paraphrase amplification phase shifting power splitting and power combiner applications A CMOS bidirectional distributed amplifier is presented that combines for the first time device level with circuit level linearization suppressing the third order intermodulation distortion It is implemented in 0.13 μm RF CMOS technology for use in highly linear low cost UWB Radio over Fiber communication systems
