Entreprises religieuses transnationales en Afrique de l'Ouest Fourchard Laurent, Mary André, Otayek René, 2005-06-01 La plupart des études menées ce jour sur les mouvements religieux en Afrique de l'Ouest ont un cadre d'étude monographique qui privilégie l'entrée par une religion ou un pays alors que les Églises les associations islamiques et même les confréries développent un prosélytisme à l'échelle de la religion du continent voire de la planète. L'objectif spécifique de cet ouvrage porte sur l'analyse comparative des réseaux transnationaux tissés par de nouveaux acteurs religieux docteurs prêcheurs et entrepreneurs. Il fait d'abord place à la variété des formes que prennent les réseaux religieux entreprises missionnaires supranationales voire centralisées associations nationales et réseaux transfrontaliers informels ou encore diasporas religieuses migrantes ou commerciales

Africa's Social and Religious Quest Randee Ijatuyi-Morphé, 2014-01-30 This well-crafted book probes the key dimensions of Africa's existential predicament. It constitutes an intellectual response to a gnawing African situation the starting point for grasping Africa's social and religious quest. Beyond split explanations of external versus internal factors e.g. colonization slavery vs. leadership cultural values this study accounts more comprehensively for emergent issues shaping this situation. The situation reflects a gamut of problems in traditional African religion and material culture which hitherto defines African communality politics and destinies vis-à-vis the cosmos and nature. Thus African religion and communities each with its own attendant values do not operate by critical engagement with larger issues of society and civilization especially those shaped by the advent of post-modernity. Rather they operate via adaptation. The communal drive for natural and social harmony inevitably produces a preservationist view of culture leaving things as they are. This study takes an integrative approach to religion society and civilization eschews dichotomies and broadly defines and re-signifies life and wholeness as a true end of Africans' quest today

African Pentecostalism Ogbu Kalu, 2008-03-31 Across Africa Christianity is thriving in all shapes and sizes. But one particular strain of Christianity prospers more than most: Pentecostalism. Pentecostals believe that everyone can personally receive the gifts of the Holy Spirit such as prophecy or the ability to speak in tongues. In Africa this kind of faith in which the supernatural is a daily presence is sweeping the continent. Today about 107 million Africans are Pentecostals and the numbers continue to rise. In this book Ogbu Kalu provides the first ever overview of Pentecostalism in Africa. He shows the amazing diversity of the faith which flourishes in many different forms in diverse local contexts. While most people believe that Pentecostalism was brought to Africa and imposed on its people by missionaries Kalu argues emphatically that this is not the case. Throughout

the book he demonstrates that African Pentecostalism is distinctly African in character not imported from the West With an even handed approach Kalu presents the religion s many functions in African life Rather than shying away from controversial issues like the role of money and prosperity in the movement Kalu describes malpractice when he sees it The only book to offer a comprehensive look at African Pentecostalism this study touches upon the movement s identity the role of missionaries media and popular culture women ethics Islam and immigration The resulting work will prove invaluable to anyone interested in Christianity outside the West *African Initiated Christianity and the Decolonisation of Development* Philipp Öhlmann, Wilhelm Gräb, Marie-Luise Frost, 2020-01-07 This book investigates the substantial and growing contribution which African Independent and Pentecostal Churches are making to sustainable development in all its manifold forms Moreover this volume seeks to elucidate how these churches reshape the very notion of sustainable development and contribute to the decolonisation of development Fostering both overarching and comparative perspectives the book includes chapters on West Africa Nigeria Ghana and Burkina Faso and Southern Africa Zimbabwe and South Africa It aims to open up a subfield focused on African Initiated Christianity within the religion and development discourse substantially broadening the scope of the existing literature Written predominantly by scholars from the African continent the chapters in this volume illuminate potentials and perspectives of African Initiated Christianity combining theoretical contributions essays by renowned church leaders and case studies focusing on particular churches or regional contexts While the contributions in this book focus on the African continent the notion of development underlying the concept of the volume is deliberately wide and multidimensional covering economic social ecological political and cultural dimensions Therefore the book will be useful for the community of scholars interested in religion and development as well as researchers within African studies anthropology development studies political science religious studies sociology of religion and theology It will also be a key resource for development policymakers and practitioners *Entreprises religieuses transnationales en Afrique de l'Ouest* FOURCHARD Laurent, MARY André et OTAYEK René (sous la direction de), 2005-06-01 La plupart des tudes men es ce jour sur les mouvements religieux en Afrique de l Ouest ont un cadre d tude monographique qui privil gie l entr e par une r gion ou un pays alors que les Eglises les associations islamiques et m mes les confr ries d veloppent un pros lytisme l chelle de la r gion du continent voire de la plan te L objet sp cifique de cet ouvrage porte sur l analyse comparative des r seaux transnationaux tiss s par de nouveaux acteurs religieux docteurs pr dicateurs et entrepreneurs Il fait d abord place la vari t des formes que prennent les r seaux religieux entreprises missionnaires supranationales voire centralis es associations nationales et r seaux transfrontaliers informels ou encore diasporas religieuses migrantes ou commer antes Internal Affairs Wendy H. Wong, 2012-07-11 Why are some international nongovernmental organizations NGOs more politically salient than others and why are some NGOs better able to influence the norms of human rights Internal Affairs shows how the organizational structures of human rights NGOs and their campaigns determine their influence on policy Drawing on data

from seven major international organizations the International Committee of the Red Cross Amnesty International Human Rights Watch M decins sans Fronti res Oxfam International Anti Slavery International and the International League of Human Rights Wendy H Wong demonstrates that NGOs that choose to centralize agenda setting and decentralize the implementation of that agenda are more successful in gaining traction in international politics Challenging the conventional wisdom that the most successful NGOs are those that find the right cause or have the most resources Wong shows that how NGOs make and implement decisions is critical to their effectiveness in influencing international norms about human rights Building on the insights of network theory and organizational sociology Wong traces how power works within NGOs and affects their external authority The internal coherence of an organization as reflected in its public statements and actions goes a long way to assure its influence over the often tumultuous elements of the international human rights landscape

The Desecularisation of the City David Goodhew,Anthony-Paul Cooper,2018-09-21 Major cities have long been seen as centres of secularisation However the number of congregations in London grew by 50% between 1979 and the present London s churches have been characterised more by growth than by decline in the decades since 1980 The Desecularisation of the City provides the first academic survey of churches in London over recent decades linking them to similar developments in other major cities across the West Produced by a large team of scholars from a range of disciplines this volume offers a striking and original portrait of congregational life in London since 1980 Seventeen chapters explore the diverse localities ethnicities and denominations that make up the church in contemporary London The vitality of London s churches in the last four decades shows that secularisation is far from inevitable in the cities of the future This study necessitates a significant reassessment of the dominant academic portrayal of Christianity in Britain and the West which has mostly depicted cities as secular spaces within a secularising culture It will be of great interest to scholars working across a wide range of disciplines including history sociology religious studies and theology

Special Report California. Division of Mines,1953 **Caught in the Current** Sam Reimer,2023-04-15 Evangelical Christianity is known for its defence of traditional Christian teachings and resistance to liberalizing trends Many Western evangelicals themselves do not yet realize how their faith is being reshaped by the modern zeitgeist Caught in the Current explores how and why Western evangelicals are changing Church attendance is declining conservative moral positions are unpopular and young people are drifting away from the faith Evangelism is avoided so few are joining congregations Yet these surface changes are

only symptoms of a more profound shift that church leaders have not fully apprehended Drawing upon 125 interviews with British and Canadian clergy and active laity Sam Reimer argues that evangelicals have been deeply influenced by a post Christian culture that has rejected institutional religious authority and embraced self spirituality As individual evangelicals struggle to navigate these waters and to distance themselves from politicized evangelicalism in the United States they are caught between conformity and resistance between faithfulness to church moral teachings and accommodation of secular values Many are responding by turning inward to define their Christian beliefs for themselves The ironic result is that the decline of institutional religious authority is not happening just in Western culture but within evangelical churches as well Caught in the Current is an insightful and nuanced assessment of how British and Canadian evangelicals are navigating a post Christian culture often in ways that are distinct from how their counterparts in the United States approach it

Christianity in the Modern World Afe Adogame, Elizabeth Olson, 2016-05-23 What is the state of Christianity today and what might it look like in the future In the West the story for a long time has revolved around decline and the loss of monopoly status but how are these shifts changing the practice of Christianity or individual belief Similarly the rapid growth of Christianities in the Global South has been well reported but the continuing complex intersections of mission Christianity with indigenous religions are less well known Large scale flows of people across increasingly fluid borders mean that not only does immigration sometimes significantly boost Christian numbers in a given country but that different forms of Christianity shift traditional religious landscapes How will emerging trends such as reverse mission from the Global South affect Christianities in areas more used to sending rather than receiving missions As the majority of believers shifts from the West to the Global South how will issues such as homosexuality be played out theologically politically and individually Will new virtual churches manage to create viable long term communities How does new festival Christianity function in the religious life of an individual The divergent and oftentimes contradictory state of Christianity in the modern world fuels questions about its place and future in the world in politics education and healthcare This book brings together cutting edge research on the most recent changes and trends in Christianity worldwide Contributors drawn from the USA UK and Europe Africa and East Asia offer an invaluable breadth of coverage expertise and disciplinary perspective at the intersections between sociology of religion theology politics education and human geography
