losing tens of thousands of pounds if permission is not granted is a huge obstacle for community groups or small cooperatives. Some form of support mechanism is needed alongside a comprehensive package of measures addressing finance, planning, grid access and advice. The Green Investment Bank could provide seed funding and project development funding for feasibility studies, grid permits etc to reduce some of the risk in getting projects through the planning process. Government needs to do more to encourage local authorities to identify suitable areas for renewable energy development and to develop clear guidance about what is expected from local energy projects. National level planning guidance should be provided on technical issues that hold up planning consent for wind turbines and other low carbon technologies.
