

***AN EVALUATIVE REVIEW  
OF A COURSE IN ENGLISH, BOOK #4***

**BY: GHOLAMABBASS SHAHHEIDARIPOUR**

**Date: December, 1998**

**1. Introduction**

Course books are said to be the core of language teaching and learning processes on which the EFL teachers and English language institutes obviously base their activities. EFL students often consult teachers for a suitable textbook or even a good institute to be recommended to them for self-study or regular classroom attendance. Frankly speaking, most of recommended textbooks are judged on superficial and physical appearances rather than from an evaluative point of view.

One of these prominent centers Iran Language Institute (ILI) affiliated with the Institute for Intellectual Development of Children and Young Adults enjoys the most popularity due to its systematic methodology, resourceful teaching materials and well-experienced teachers. The course books are prepared and adapted by the publishing office of the ILI and are used by all branches through the country. Course books BE, BA, 1, 2, 3 are elementary, 4, 5, 6, 7 are intermediate and 8 through 12 are considered for advanced users. Course books 4-7 have the same format and this paper will mostly deal with level four course book.

**2. Significance of the Study**

Iran Language Institute is as a prominent institute, being overwhelmed by enthusiastic students waiting long enough to be enrolled in EFL classrooms, claims an eclectic approach to EFL teaching, but the course books appear to be based on audio-lingual material design procedures. Therefore, there appears to be a strong and sufficient rationale for a survey to be conducted to locate strengths and possible weaknesses of the course book series. Furthermore, it has been observed and reported that, at times, teachers complain of the contents of the course books. Moreover, the researcher teaching these series up to course book #5 has experienced some of these shortcomings, especially in level 4 resulting in many students failure.

To carry out this piece of study, the reviewer has utilized frameworks proposed by Sheldon (1988) and Skierso (1991) which contain a comprehensive summary of common core factors that reviewers, administrators, teachers, learners, academic and educational advisors most frequently adhere to when deciding on the selection and use of a textbook.

Oxford Textbook of Cancer Biology Francesco Pezzella,Mahvash Tavassoli,David J. Kerr,2019-05-06 The study of the biology of tumours has grown to become markedly interdisciplinary involving chemists statisticians epidemiologists mathematicians bioinformaticians and computer scientists alongside biologists geneticists and clinicians The Oxford Textbook of Cancer Biology brings together the most up to date developments from different branches of research into one coherent volume providing a comprehensive and current account of this rapidly evolving field Structured in eight sections the book starts with a review of the development and biology of multi cellular organisms how they maintain a healthy homeostasis in an individual and a description of the molecular basis of cancer development The book then illustrates as once cells become neoplastic their signalling network is altered and pathological behaviour follows It explores the changes that cancer cells can induce in nearby normal tissue the new relationship established between them and the stroma and the interaction between the immune system and tumour growth The authors illustrate the contribution provided by high throughput techniques to map cancer at different levels from genomic sequencing to cellular metabolic functions and how information technology with its vast amounts of data is integrated with traditional cell biology to provide a global view of the disease The effect of the different types of treatments on the biology of the neoplastic cells are explored to understand on the one side why some treatments succeed and on the other how they can affect the biology of resistant and recurrent disease The book concludes by summarizing what we know to date about cancer and in what direction our understanding of cancer is moving Edited by leading authorities in the field with an international team of contributors this book is an essential resource for scholars and professionals working in the wide variety of sub disciplines that make up today s cancer research and treatment community It is written not only for consultation but also for easy cover to cover reading
