

PROPANE (LP) CONVERSION INSTRUCTIONS

⚠WARNING

Explosion Hazard
Death or serious injury can result from failure to follow these instructions.

- Service by a qualified service technician only.
- Shut off gas supply and disconnect power before servicing.
- Reconnect all grounding devices after service.
- Replace all parts and panels before operating.

The pressure regulator and the burner orifices are set for natural gas. To use propane (LP) gas, the regulator and burner orifices must be converted.

⚠WARNING

Do not operate the cooking or oven burners of the range when using propane (LP) (bottled) gas before converting the pressure regulator and burner orifices for propane (LP) gas use. Failure to do so could cause high flames and back flames which can result in serious injury.

The propane orifices for the cooktop burners are shipped on the back of the range in the location shown.

TOOLS REQUIRED:

- Adjustable wrench
- 1/2" Open-end wrench
- Phillips head screwdriver
- Flat headed screwdriver (blade approximately 3/32" across)
- Nut drivers, 1/4", 5/16" or 3/8"

To adjust your range for use with propane (LP) gas, follow these instructions:

1. Disconnect all electrical power at the main circuit breaker or fuse box.
2. Shut off the gas supply to the range by closing the manual shut-off valve.

CONVERTING THE PRESSURE REGULATOR

The pressure regulator is located on the rear of the range. (Some models will have a shield shield protecting the regulator that must be removed for conversion and reinstalled when conversion is complete.) The pressure regulator is located in the lower, left hand side of the range as viewed from the front left.

NOTICE:

If you are using propane (LP) (bottled) gas, all adjustments described in the following steps must be made before you make any burner adjustments.

1. Use an adjustable wrench to unscrew the hex nut cap from the pressure regulator.
2. Completely remove the protective plastic cap off the threaded metal cap.

3. Turn the metal cap to the type of gas being converted to is displayed and replace the protective plastic cover.
4. Screw the hex nut cap back into the regulator (Do not over tighten).

CONVERTING THE COOKTOP BURNERS

- A. Remove the top grates, burner caps and burner heads.

- B. Using a 7 mm or 9/32" nut driver, remove the top burner orifices. These may be accessed through the burner opening in the table.

NOTICE:

Save these orifices for future conversion back to natural gas.

- C. Remove the propane (LP) orifices from the box provided. The propane (LP) orifices have the letter "L" on the top. To aid in identifying the proper location for the propane (LP) orifices during conversion from Natural Gas to Propane (LP) Gas, color codes have been added to the side or top of the orifice. See the chart below. Each orifice may also show a series of engraved marks (L, S, W, ...) located on the top.

BURNER OUTPUT RATINGS RETURN				
Propane (LP) Gas 10" W.D.P.

- D. Install the propane (LP) orifices in their precise locations.

To prevent leakage, make sure the orifice spuds are securely compressed into the gas supply tubes.

- E. Install the old orifice spuds into the metal box or bracket along with these instructions, and replace onto the back of the range for possible future conversion.
