**Automotive Product Development** Vivek D. Bhise, 2017-05-08 This book is about how to develop future automotive products by applying the latest methodologies based on a systems engineering approach and by taking into account many issues facing the auto industry such as meeting government safety emissions and fuel economy regulations, incorporating advances in new technology applications in structural materials, powertrains, vehicle lighting systems, displays and telematics and satisfying the very demanding customer. It is financially disastrous for any automotive company to create a vehicle that very few people want. To design an automotive product that will be successful in the marketplace requires carefully orchestrated teamwork of experts from many disciplines, substantial amount of resources and application of proven techniques at the right time during the product development process. *Automotive Product Development: A Systems Engineering Implementation* is intended for company management personnel and graduate students in engineering, business management and other disciplines associated with the development of automotive and other complex products.

**Assistive Technologies and Environmental Interventions in Healthcare** Lynn Gitlow, Kathleen Flecky, 2019-08-08 Providing a holistic and client-centered approach, *Assistive Technologies and Environmental Interventions in Healthcare* explores the individual's needs within the environment, examines the relationship between disability and a variety of traditional and cutting-edge technologies and presents a humanistic discussion of Technology Environment Intervention (TEI). Written by a multidisciplinary team of authors, this text introduces readers to a variety of conceptual practice models and the clinical reasoning perspectives. It also provides insight into how designers go about solving human-tech problems, discusses best practices for both face-to-face and virtual teams and looks at the psychological, sociocultural and cognitive factors behind the development and provision of assistive technologies. Examines a wide range of technologies and environmental interventions. Demonstrates how a better understanding of the complexity of human interaction with both the physical and social environment can lead to better use of technology. Explores the future of technology and research in TEI. Complete with a range of learning features such as keywords, case studies and review questions, this book is ideal for undergraduate and graduate students in occupational therapy and other related health professions as well as those undertaking certification and
