

GeOMeTry TIE~TAE~TOE

Choose your own geometry assignments! You must choose at least three activities in a tic-tac-toe box design (horizontal, diagonal, or vertical). Color in each box as you complete each assignment. Have fun!

Write directions for someone who does not know how to measure angles. Be very clear and draw pictures to describe each of your steps.	Make a top ten list of important things you learned during the geometry unit.	Locate a flag from a different country. Label and list all of the geometric concepts that are displayed by that flag.
Create a math dictionary page for 5 of your vocabulary words. Challenge yourself!	Come up with your own idea for a way to demonstrate your knowledge of geometry. Your teacher must approve in first!	Write a letter to your parents describing how geometry relates to the real world. Explain to them why you think learning geometry is important and why everyone should know and understand it.
Write a skit that could teach other kids (or adults) about at least SEVEN of the geometry concepts we have covered.	Write a "lost and found" ad for each type of angle OR each type of polygon you learned about. In the ad, describe the missing item so that someone else will recognize it immediately.	Create a game that you and another person (or two!) could play that reviews at least FIVE of the geometry concepts we have talked about.
