Integration of Reusable Systems Thouraya Bouabana-Tebibel, Stuart H. Rubin, 2014-02-17 Software reuse and integration has been described as the process of creating software systems from existing software rather than building software systems from scratch Whereas reuse solely deals with the artifacts creation integration focuses on how reusable artifacts interact with the already existing parts of the specified transformation Currently most reuse research focuses on creating and integrating adaptable components at development or at compile time However with the emergence of ubiquitous computing reuse technologies that can support adaptation and reconfiguration of architectures and components at runtime are in demand This edited book includes 15 high quality research papers written by experts in information reuse and integration to cover the most recent advances in the field These papers are extended versions of the best papers which were presented at IEEE International Conference on Information Reuse and Integration and IEEE International Workshop on Formal Methods Integration which was held in San Francisco in August 2013

The Biology and Technology of Intelligent Autonomous Agents Luc Steels, 2012-12-06 The NATO sponsored Advanced Study Institute The Biology and Technology of Intelligent Autonomous Agents was an extraordinary event For two weeks it brought together the leading proponents of the new behavior oriented approach to Artificial Intelligence in Castel Ivano near Trento The goal of the meeting was to establish a solid scientific and technological foundation for the field of intelligent autonomous agents with a bias towards the new methodologies and techniques that have recently been developed in Artificial Intelligence under the strong influence of biology Major themes of the conference were bottom up AI research artificial life neural networks and techniques of emergent functionality The meeting was such an extraordinary event because it not only featured very high quality lectures on autonomous agents and the various fields feeding it but also robot laboratories which were set up by the MIT AI laboratory with a lab led by Rodney Brooks and the VUB AI laboratory with labs led by Tim Smithers and Luc Steels This way the participants could also gain practical experience and discuss in concreto what the difficulties and achievements were of different approaches In fact the meeting has been such a success that a follow up meeting is planned for September 1995 in Monte Verita Switzerland This meeting is organised by Rolf Pfeifer University of Zurich

Agent and Multi-Agent Systems: Technologies and Applications Anne Hakansson, Ronald Hartung, 2009-05-30 This volume contains the proceedings of the Third KES Symposium on Agent and Multi agent Systems Technologies and Applications KES AMSTA 2009 held at Uppsala University in Sweden during June 3 5 2009 The symposium was organized by Uppsala University KES International and its Focus Group on Agent and Multi agent Systems The KES AMSTA Symposium series is a sub series of the KES Conference series Following the successes of the First KES Symposium on Agent and Multi agent Systems Technologies and Applications KES AMSTA 2007 held in Wroclaw Poland from May 31 to 1 June 2007 and the Second KES Symposium on Agent and Multi agent Systems Technologies and Applications KES AMSTA 2008 held in Incheon Korea March 26 28 2008

KES AMSTA 2009 featured keynote talks oral and poster presentations and a number of workshops and invited sessions closely aligned to the themes of the conference The aim of the symposium was to provide an international forum for scientific search into the technologies and applications of agent and multi agent systems Agent and multi agent systems are an innovative type of modern software system and have long been recognized as a promising technology for constructing autonomous complex and intelligent systems A key development in the field of agent and multi agent systems has been the specification of agent communication languages and formalization of ontologies Agent communication languages are intended to provide standard declarative mechanisms for agents to communicate knowledge and make requests of each other whereas ontologies are intended for conceptualization of the knowledge domain

Intelligent Transportation Systems (ITS) Beatriz L. Boada, 2021-04-22 This book presents collective works published in the recent Special Issue SI entitled Intelligent Transportation Systems ITS These works address problems of mobility environmental pollution and road safety as well as their related applications The presented problems are complex and involve a large number of research areas and many advanced technologies such as communication sensing and control which are used for managing a large amount of information The applications vary and include fleet management driving behavior traffic control trajectory planning connected vehicles and energy consumption efficiency Recent advances in communication technologies are becoming fundamental for the development of new advances in fleet management traffic control and connected vehicles This work collected in this Special Issue propose solution methodologies to address such challenges analyze the proposed methodologies and evaluate their performance This book brings together a collection of multidisciplinary works applied to ITS applications in a coherent manner

Abstraction, Reformulation and Approximation Jean-Daniel Zucker, Lorenza Saitta, 2005-07-14 This book constitutes the refereed proceedings of the 6th International Symposium on Abstraction Reformulation and Approximation SARA 2005 held in Airth Castle Scotland UK in July 2005 The 17 revised full papers and 8 extended abstracts were carefully reviewed and selected for inclusion in the book Also included are 3 invited papers and 8 research summaries All current aspects of abstraction reformulation and approximation in the context of human common sense reasoning problem solving and efficiently reasoning in complex domains are addressed Among the application fields of these techniques are automatic programming constraint satisfaction design diagnosis machine learning search planning reasoning game playing scheduling and theorem proving

New Advances in Machine Learning Yagang Zhang, 2010-02-01 The purpose of this book is to provide an up to date and systematical introduction to the principles and algorithms of machine learning The definition of learning is broad enough to include most tasks that we commonly call learning tasks as we use the word in daily life It is also broad enough to encompass computers that improve from experience in quite straightforward ways The book will be of interest to industrial engineers and scientists as well as academics who wish to pursue machine learning The book is intended for both graduate and postgraduate students in fields such as

computer science cybernetics system sciences engineering statistics and social sciences and as a reference for software professionals and practitioners The wide scope of the book provides a good introduction to many approaches of machine learning and it is also the source of useful bibliographical information
