

## UNIT 6: Weather

### LAB 6-5: WEATHER PATTERNS

**INTRODUCTION:** A basic principle in the Earth sciences is that energy is constantly bringing about changes. In order to understand the changing Earth, we must understand the energy systems at play within the environment which cause those changes.

The study of energy interactions within the atmosphere leads to the identification of systems that can be mapped as field quantities. A series of composite maps showing these atmospheric variables provides a picture of past and present conditions. Such a composite map is called a **synoptic map**. Weather forecasting is based on a series of synoptic maps.

**OBJECTIVE:** You will construct field maps and learn to identify patterns that can be used to predict weather.

#### VOCABULARY:

synoptic weather map:

isobars:

barometric (atmospheric) pressure:

isobar:

convergence:

divergence:

cyclone:

anticyclone:

air mass:

source region:

front:
