Scientific and Technical Aerospace Reports ,1995 **Zoological Physics** Boye K. Ahlborn,2006-09-29 Zoological Physics presents a physicist s view of life The primary life functions of animals such as eating growing reproducing and getting around all depend on motion Motion of food into the organism motion of materials through the body motion of limbs and motion of the entire body through water air and on land These activities are controlled by internal information stored in the genes or generated in the brain and by external information gathered by the senses predominantly eyes and ears This book models these life functions with the tools of physics It is aimed at students of life science engineering and physics but will also appeal to other readers with a general interest in animals The Burning Answer Keith Barnham,2015-05-15 Our society faces a choice We could be enjoying a sustainable lifestyle but we have chosen not to In three generations we have consumed half the oil produced by photosynthesis over eight million generations In two generations we have used half our uranium resources With threats from global warming oil depletion and nuclear disaster we are running out of options Solar power as Keith Barnham says is our necessary solution Barnham explains that the roots of solar energy lie in a little known equation $E = hf$ an equation which was coincidentally celebrated and explained to the world by Einstein in the same year he discovered $E = mc^2$ He alleges that the former equation has been overlooked in favor of the latter much to our detriment and Barnham is here to offer us a solution We can still turn things around and solar energy is the key In this provocative inspiring passionately argued book Keith Barnham outlines actions that any one and all of us can take to make an impact now and on future generations The Burning Answer is a solar manifesto for the new climate aware generation and a must read for climate change skeptics
