Mintzes,Emily M. Walter,2020-02-23 This book explores evidence based practice in college science teaching It is grounded in disciplinary education research by practicing scientists who have chosen to take Wieman s 2014 challenge seriously and to investigate claims about the efficacy of alternative strategies in college science teaching In editing this book we have chosen to showcase outstanding cases of exemplary practice supported by solid evidence and to include practitioners who offer models of teaching and learning that meet the high standards of the scientific disciplines Our intention is to let these distinguished scientists speak for themselves and to offer authentic guidance to those who seek models of excellence Our primary audience consists of the thousands of dedicated faculty and graduate students who teach undergraduate science at community and technical colleges 4 year liberal arts institutions comprehensive regional campuses and flagship research universities In keeping with Wieman s challenge our primary focus has been on identifying classroom practices that encourage and support meaningful learning and conceptual understanding in the natural sciences The content is structured as follows after an Introduction based on Constructivist Learning Theory Section I the practices we explore are Eliciting Ideas and Encouraging Reflection Section II Using Clickers to Engage Students Section III Supporting Peer Interaction through Small Group Activities Section IV Restructuring Curriculum and Instruction Section V Rethinking the Physical Environment Section VI Enhancing Understanding with Technology Section VII and Assessing Understanding Section VIII The book s final section IX is devoted to Professional Issues facing college and university faculty who choose to adopt active learning in their courses The common feature underlying all of the strategies described in this book is their emphasis on actively engaging students who seek to make sense of natural objects and events Many of the strategies we highlight emerge from a constructivist view of learning that has gained widespread acceptance in recent years In this view learners make sense of the world by forging connections between new ideas and those that are part of their existing knowledge base For most students that knowledge base is riddled with a host of na ve notions misconceptions and alternative conceptions they have acquired throughout their lives To a considerable extent the job of the teacher is to coax out these ideas to help students understand how their ideas differ from the scientifically accepted view to assist as students restructure and reconcile their newly acquired knowledge

and to provide opportunities for students to evaluate what they have learned and apply it in novel circumstances Clearly this prescription demands far more than most college and university scientists have been prepared for *From Food Scarcity to Surplus* Ashok Gulati,Yuan Zhou,Jikun Huang,Alon Tal,Ritika Juneja,2021-02-07 This book brings together unique experiences of India China and Israel in overcoming economic social and natural resource challenges Through its eleven chapters the book captures the role of groundbreaking innovations in achieving unprecedented agricultural growth and stabilizing these nations It provides a future outlook of the new challenges that will confront these countries in 2030 and beyond related to tackling food and nutrition security sustainable agricultural growth and adhering to improved food safety standards This book provides useful insights for exploring technological innovations and policies that can address these future challenges and develop profitable and sustainable agriculture This volume also highlights valuable lessons that India China and Israel provide for the rest of the developing world where population is growing fast natural resources are limited and it is a challenge to produce enough food feed and fibre for their populations Tracing the historical past this book is an impressive resource for academicians policymakers practitioners agribusiness players entrepreneurs in understanding the role of innovations in addressing future challenges September 2019 Monthly Current Affairs with MCQs for Competitive Exams Disha Experts,2019-09-01
