Performance Tasks Graph Points Coordinate Plane:

Designing Assessment for Mathematics Eileen Depka, 2007-05-31 Clearly demonstrates how to design rubrics for math a content area that desperately needs support The use of rubrics combined with performance tasks helps educators teach math at a higher more engaging level A must have book for all educators seeking to build a strong thinking based math program Lee Ann Cervini Principal Holley Elementary School NY Makes a distinct contribution to the field Not only does the text clearly explain how to create rubrics and performance tasks in a step by step manner each chapter also provides an example for immediate use in the classroom Marcia Carlson Sixth Grade Teacher Crestview Elementary School Clive IA Enhance students understanding of math concepts through rubrics and hands on learning Teaching mathematics in today s world requires practices and procedures integrated with performance tasks that actively involve students In this second edition of Designing Rubrics for Mathematics Eileen Depka clarifies the purpose of rubrics in math instruction and illustrates the relationship between assessment rubrics and the National Council of Teachers of Mathematics Principles and Standards for School Mathematics 2000 Each chapter in this research based updated edition offers easy to use strategies suggestions creative sample problems and tasks to engage students in hands on learning while allowing them to have fun in the process With two new chapters focused on communication to deepen students understanding of math concepts and using rubric data to improve instruction this resource provides teachers with Reflective activities to use with students for metacognitive processing Strategies for creating standards linked rubrics plus samples Tips for differentiating performance tasks How to s for student created rubrics Internet resource links for rubric development mathematical focal points and standards

Designing Assessment for Mathematics Second Edition demonstrates how to drive instruction and successfully boost achievement levels by providing students with experiences that impact their learning and performance [How to Design Questions and Tasks to Assess Student Thinking](#) Susan M. Brookhart, 2014-08-20 With new standards emphasizing higher order thinking skills students will have to demonstrate their ability to do far more than simply remember facts and procedures But what s the best way for teachers to ensure that students have such skills In this highly accessible guide author Susan M Brookhart shows how to do just that by providing specific guidelines for designing targeted questions and tasks that align with standards and assess students ability to think at higher levels Aided by dozens of examples across grade levels and subject areas readers will learn how to take a student perspective and view assessment questions and tasks as problems to solve design multiple choice questions that require higher order thinking understand the difference between open and closed questions and how to use open questions effectively vary and control the features of performance assessment tasks including cognitive level and difficulty to target different thinking skills and manage the assessment of higher order thinking within the larger context of teaching and learning Brookhart also provides an idea bank that teachers can use to jump start their own thinking as they create assessments Timely and practical How to Design Questions and Tasks

to Assess Student Thinking is essential reading for 21st century teachers who want their students to excel in the classroom and beyond

Math Instruction for Students with Learning Problems Susan Perry Gurganus, 2017-02-24 Math Instruction for Students with Learning Problems Second Edition provides a research based approach to mathematics instruction designed to build confidence and competence in pre and in service PreK 12 teachers This core textbook addresses teacher and student attitudes toward mathematics as well as language issues specific mathematics disabilities prior experiences and cognitive and metacognitive factors The material is rich with opportunities for class activities and field extensions and the second edition has been fully updated to reference both NCTM and CCSSM standards throughout the text and includes an entirely new chapter on measurement and data analysis

Mathematical Tasks in Classrooms Around the World ,2010-01-01 Mathematical tasks have long been recognized as crucial mediators between mathematical content and the mathematics learner For many people the mathematics classroom is defined by the type of tasks one finds there and this is appropriate Mathematical tasks are the embodiment of the curricular pretext that brings each particular set of individuals together in every mathematics classroom In other contexts individuals come together to engage in musical performances or dramatic performances The performances of the mathematics classroom are largely the performance of mathematical tasks and if we are to understand and facilitate the learning that is the purpose of such settings then we must understand the nature of the performances that we find there The classroom performance of a task is ultimately a unique synthesis of task teacher students and situation Of particular interest are differences in the function of mathematically similar tasks when employed by different teachers in different classrooms for different instructional purposes with different students By making comparison possible between the classroom use of mathematical tasks in different classrooms around the world the analyses reported in this book reveal the profound differences in how each teacher utilises mathematical tasks in partnership with their students to create a distinctive form of mathematical activity The Learner s Perspective Study aims to juxtapose the observable practices of the classroom and the meanings attributed to those practices by classroom participants The LPS research design documents sequences of at least ten lessons using three video cameras supplemented by the reconstructive accounts of classroom participants obtained in post lesson video stimulated interviews and by test and questionnaire data and copies of student written material In each participating country data generation focuses on the classrooms of three teachers identified by the local mathematics education community as competent and situated in demographically different school communities within the one major city The large body of complex data supports both the characterisation of practice in the classrooms of competent teachers and the development of theory

Culturally and Socially Responsible Assessment Catherine S. Taylor, Susan Bobbitt Nolen, 2022 This book addresses a problem that affects the work of all educators how traditional methods of assessment undermine the capacity of schools to serve students with diverse cultural and social backgrounds and identities Anchored in a commonsense notion of validity this book explains how current K 12 assessment practices are grounded in the language experiences and values of the dominant White culture It presents a timely review of research on bias in classroom and large scale assessments as well as research on how students level of engagement influences their performances The author recommends practices that can improve the validity of students assessment performances by minimizing sources of bias using culturally responsive assessment tools and adopting strategies likely to increase students engagement with assessment tasks This practical resource provides subject specific approaches for improving the cultural and social relevance of assessment tools and offers guidance for evaluating existing assessment instruments for bias language complexity and accessibility issues Book Features Research based recommendations for improving assessment fairness validity and cultural social relevance Practices that have been shown to improve the effectiveness of classroom assessments in supporting student learning Concrete examples of how to create culturally relevant assessment tasks that target valued learning goals in language arts mathematics social studies and science classrooms Appendixes that provide tools educators can use to improve grading practices
