Mike Walker, 2017-04-23 *Escape From Iran* is just the thing to help you chase those Islamophobic blues away The adventures of Ara Vartan a California stoner musician trapped in Iran in the midst of its 1979 80 revolution will blow your mind We first encounter Ara in a remote Kurdish Mountain village where he is studying Iranian music When the revolution comes to the village Ara runs for his life On a bus

rushing back to the US Embassy in Tehran he meets Kereshmae Nasraddin a modern Iranian woman on her way to join a counter revolutionary guerrilla group and demonstrate against the new government Thrown together by fate then captured after curfew they are separated and subject to execution While waiting for death Ara encounters his old Berkeley friend Dr Mostafa Bazari a pillar of the revolution who fights to save their lives Devilishly plotted Ara barely gets out of one terrifying episode before he finds himself thrust into another even more mind boggling event Before we re done we have been introduced to many elements of Iranian society which like a kaleidoscope helps us to understand so much about the revolution its necessity and the hopes and fears of Iranians with regard to it Escape From Iran is a devastating revelation of how the Iranian revolution was experienced by Iranians of different walks of life Although fiction it reveals an unexpectedly complex historical understanding of the period Edmund Burke Emeritus Professor of Middle East History University of California Santa Cruz

Light and Waves Steven S. Andrews,2023-05-13 This book explores light and other types of waves using this as a window into other aspects of physics It emphasizes a conceptual understanding using examples chosen from everyday life and the natural environment For example it explains how hummingbird feathers create shimmering colors how musical instruments produce sound and how atoms stick together to form molecules It provides a unique perspective on physics by emphasizing commonalities among different types of waves including string waves water waves sound waves light waves the matter waves of quantum mechanics and the gravitational waves of general relativity This book is targeted toward college non science majors advanced high school students and adults who are curious about our physical world It assumes familiarity with algebra but no further mathematics and is classroom ready with many worked examples exercises exploratory puzzles and appendices to support students from a variety of backgrounds

Iranian Culture Nasrin Rahimieh,2015-08-27 Throughout modern Iranian history culture has served as a means of imposing unity and cohesion onto society The Pahlavi monarchs used it to project an image of Iran as an ancient civilisation re emerging as an equal to Western nations while the revolutionaries deployed it to remake the country into an Islamic nation Just as Iranian culture has been continually re interpreted the representations and avocations of Iranian identity vary amongst Iranians across the world Iranian Culture Representation and Identity demonstrates these fissures and the incompatibilities that refuse to be written out of national culture analysing works of literature popular music graphic art and film as well as oral narratives Using works produced before and after the 1979 revolution created both inside and outside of Iran this study reveals neglected complexities and contradictions in the field of Iranian cultural production It considers how contested claims to culture whether they originated in Iran or the Iranian diaspora shape our understanding of this culture and what spaces they create for new articulations of it and in doing so offers an important re examination of our collective concept of culture This book would be an excellent resource for students and scholars of Middle East Studies and Iranian Studies specifically Iranian culture including film and contemporary literature and the Iranian diaspora

The Piano Tuner Peter Meinke,2012-03-15

In *The Piano Tuner* Peter Meinke writes of the foreignness that awaits us when we go abroad and when we answer our own front door to admit a stranger that confronts us in unfamiliar cities and villages and in the equally disquieting surroundings of our memories and regrets. Often in these stories what seems a safe comfortable environment turns suddenly threatening. In the title story a writer's quiet existence amid his antiques and books is dismantled piece by piece by a demonic beer-bellied piano tuner. In *The Ponoos* a man recalls how as a young boy living in Brooklyn during World War II he became a collaborationist in the brutal pranks of two Irish bullies. In *The Twisted River* the sedate collegiality of a Polish university is disrupted when an American on a Fulbright grant attempts to blackmail two faculty members. And in *The Bracelet* a young anthropology student doing field work in Africa finds herself drawn further and further into the role of a priestess of Oshun into a life dictated by the configuration of cowry shells cast upon the floor. Meinke writes of a world where our control over our lives seldom exists across a border and often extends no further than our fingertips. Attempts to bridge two cultures, two lives are sometimes successful as when an actor finds love in the arms of a tough talking barmaid but more usually lead to disillusionment as when a hard drinking salesman's career is shattered after he is drunk under the table one night by a Polish engineer or when an English father struggles to find common ground with his American son. Riveting almost terrifying the stories in *The Piano Tuner* tell of decent men and women caught in events that they could never have predicted would never have chosen.

Exploring Psalms John Phillips, 2001-10 John Phillips writes with enthusiasm and clarity cutting through the confusion and heretical dangers associated with Bible interpretation. *Moody Magazine*

Foundations in Music

Psychology Peter Jason Rentfrow, Daniel J. Levitin, 2019-03-12 A state of the art overview of the latest theory and research in music psychology written by leaders in the field. This authoritative landmark volume offers a comprehensive state of the art overview of the latest theory and research in music perception and cognition. Eminent scholars from a range of disciplines employing a variety of methodologies describe important findings from core areas of the field including music cognition, the neuroscience of music, musical performance and music therapy. The book can be used as a textbook for courses in music cognition, auditory perception, science of music, psychology of music, philosophy of music and music therapy and as a reference for researchers, teachers and musicians. The book's sections cover music perception, music cognition, music neurobiology and evolution, musical training, ability and performance and musical experience in everyday life. Chapters treat such topics as pitch, rhythm and timbre, musical expectancy, musicality, musical disorders and absolute pitch, brain processes involved in music perception, cross species studies of music cognition and music across cultures, improvisation, the assessment of musical ability and singing and music and emotions, musical preferences and music therapy. Math for Mystics Renna Shesso, 2007-04-01 Much of math history comes to us from early astrologers who needed to be able to describe and record what they saw in the night sky Whether you were the king's court astrologer or a farmer marking the best time for planting timekeeping and numbers really mattered Mistake a numerical pattern of petals and you could be poisoned Lose the rhythm of a sacred dance or the meter of a ritually told story and the intricately woven threads that hold life together were spoiled Ignore the celestial clock of equinoxes and solstices and you'd risk being caught short of food for the winter Shesso's friendly tone and clear grasp of the information make the math go down easy in this marvelous book
