Concepts, Policies and Technology for Sustainable Buildings Thanuja Ramachandra, Roshani Palliyaguru, Gayani Karunasena, 2025-07-12 This book presents knowledge on sustainability concepts policies and technologies adopted in both developed and developing countries The book covers five themes a advancing sustainability building rating systems b promoting retrofitting buildings and warranting energy efficient buildings c realizing water efficiency within building structures d application of the circular economy to manage waste and e enhancing the health and well being of building occupants The first theme includes case study based evidence and solutions to different rating systems used in different countries The second and third themes mainly focus on the achievement of sustainability under the key parameters of energy efficiency and water efficiency through the application of various techniques and technologies such as green roofs green walls and grid tied solar photovoltaic technology with a special emphasis on retrofitting techniques in different case study contexts The fourth theme primarily addresses the need to clarify misconceptions surrounding the concept of the circular economy within the construction industry It explores its broader applications in various contexts aiming to uncover opportunities for knowledge expansion and transfer across different countries The fifth and final theme of the book addresses various good practices and tools developed to enhance the health and well being of building occupants with a primary focus on how such things help achieve sustainable buildings

Life-Cycle Cost Models for Green Buildings I.M. Chethana S. Illankoon, Vivian W. Y. Tam, Khoa N. Le, 2020-10-29 Life

Cycle Cost Models for Green Buildings With Optimal Green Star Credits illustrates the tools and methods for developing a life cycle cost model that incorporates developer constraints while maximizing the number of credit points achieved. The book identifies the interdependencies among various credits in the Green Star environmental rating system. Afterwards, life cycle cost is calculated by considering six main central business districts (CBDs) of Australia. The net present value (NPV) technique is used to calculate life cycle costs. Further, a sensitivity analysis is also carried out for selected credits to identify the changes to life cycle cost to the changes in discount rate. Once all the life cycle cost data is calculated, this book illustrates the development of the proposed model using a Java application which allows users to evaluate each key criterion of green buildings separately. The book is designed to provide ample knowledge of the various options available to get green building certification and the further implications in terms of life cycle. Provides cost saving and management advice for keeping a green building project operating on time and budget throughout their life cycle. Expertly explains the various options available for gaining green building certification. Allows users to build life cycle cost models which is unique to the project at hand.

Cost Studies of Buildings Allan Ashworth, Srinath Perera, 2013-09-13 This practical guide to cost studies of buildings has been updated and revised throughout for the 5th edition. New chapters have been added on the RICS New Rules of Measurement (NRM) for order of cost estimating and elemental cost planning and on the procurement of construction projects.

The Expert Witness in Construction Robert Horne, John Mullen, 2013-08-26 The role of the expert witness has long been important in the resolution of construction disputes. The specialist opinion brought by the expert can aid understanding and interpretation of the facts of the dispute and may be influential in deciding the outcome. The variety of dispute resolution procedures and the requirement for the expert witness to be independent places a heavy burden on the parties to identify and instruct an appropriate expert and on the expert to ensure they discharge their duty in the correct manner. *The Expert Witness in Construction* explains in practical terms the way in which experts work with particular reference to the construction industry. Within this book, the expert's role is explained in legal and practical terms as a progression from understanding the basic principles by which experts can be identified through appointment to giving evidence before a tribunal. At every stage, commentary is given to help and guide professionals new to the arena of expert evidence act as a resource for those already acting as experts assist party representatives looking for best practice guidance on the instruction of experts and provide parties to disputes information on what they should expect from the expert they appoint to explain the issues in the case. Covering all the implications of identifying, appointing, instructing, and relying on experts, it will help the reader to understand why experts are instructed in the way they are, how to identify the expert that is

right for a particular case and how evidence should be presented Written by a practicing lawyer and a consultant with extensive experience of acting as an expert witness the requirements of both the lawyer and expert are discussed As such it will help both parties to understand each other resulting in a closer more productive working relationship Building Maintenance Processes and Practices Abdul Lateef Olanrewaju, Abdul-Rashid Abdul-Aziz, 2014-11-14 This book is designed to be an inclusive for the best practice approach to building maintenance management where the processes procedures and operational systems meet a high standard of professional and academic competence It offers a different perspective on building maintenance management by presenting the schematic building maintenance value chain model and its implementation in Malaysian university buildings The findings show an improvement to building performance lower maintenance cost building sustainability and increased maintenance service user satisfaction The learning outcomes and summaries provided for each chapter and the extensive use of tables and figures add to the readability of the text Though the book is based on data from Malaysia it is useful for a much wider audience and the informal writing style makes it an interesting reference source This book is valuable for readers who are practitioners professionals and for academic institutions that offer courses in the building field including architecture quantity surveying civil engineering building and facility management property management real estate It will also be of interest to governments and others involved in the construction industry *Rawlinsons Construction Cost Guide 2012* Rawlinsons Group, 2012 **Rawlinsons Construction Cost Guide 2011**, 2011
