

Midterm Study Guide

This midterm exam consists of 15 questions which relate to material from the first 11 weeks of the course including assigned reading books (the text, articles, journals, and illustrated documents). This exam questions are randomly selected from which chapters from question pools so that the questions you get will be different from those another student gets. Specifically, the questions address material from Chapters 4, 10, and 11.

4.	Under chapter 4 describe the various systems related to the information collected, computerized or otherwise (data mining). Identify and explain the various components that are used in data mining systems and describe how they function.
10.	Under 10 describe various planning approaches (generally using the concept of scenario building and regression analysis) related to forecasting demand. Identify and explain the various components that are used in forecasting demand and describe how they function.
11.	Under 11 describe various the supply management, identify and explain the various components that are used in supply management and describe how they function. Identify and explain the various components that are used in supply management and describe how they function.

In preparing for this exam you should be familiar with:

- Information security dependent on driving the security architecture development.
- Identification of security threats and vulnerabilities in computer environments.
- Identification of security controls within various threats and vulnerabilities in computer environments.
- Techniques and controls used in the development of secure operating systems and programs.
- Techniques and controls used in secure networked security.
- The function of networking protocol stacks - in particular TCP/IP and its subprotocols such as DNS, DHCP, ARP, RARP, etc.
- Identification of different types of threats and their controls.
- The functional use of symmetric and asymmetric encryption and the role of public and private keys in implementing these controls.
- Techniques used in monitoring and management.
- The strengths and weakness of various authentication methods.
