English a Changing Medium for Education Constant Leung,Brian V. Street,2012-07-25 In this volume a range of authors from different international contexts argue that the notion of communicative competence in English hitherto largely referenced to metropolitan native speaker norms has to be expanded to take account of diverse contexts of use for a variety of purposes It also discusses the popular belief that language and literacy should simply be regarded as a technical skill

which confers universal benefits and that it should be replaced with a social practice view that recognises situated variations and diversity This volume we believe provides a reference point for extended research and practice in these areas that will be of interest to wide range of people engaged in language and literacy education Annual Report of the Superintendent of Public Instruction of the State of Michigan Michigan.
