*Marine Omics in a Changing Ocean: Modelling Molecular Pathways and Networks to Understand Species Acclimation and Adaptation* Carolina Madeira, Piero Calosi, Diana Sofia Madeira, 2024-07-08 Global climate change is a major threat to marine biodiversity worldwide Average changes in ocean temperature pH and oxygenation are re shaping marine communities with significant impacts on the critical services that marine ecosystems provide to mankind As global climate change continues the frequency duration and intensity of extreme weather events are also predicted to increase with fast and far reaching consequences on marine species including mass mortality and disruption of ecological processes As a result millions of ocean dependent livelihoods and jobs are also at risk with consequent economic impacts Given the current climate and biodiversity crisis the Intergovernmental Science Policy Platform on Biodiversity and Ecosystem Services has emphasized the relevance of 1 increasing knowledge and protection of biodiversity and 2 assessing species climate driven extinction risks To achieve these goals we need to understand organism environment ecology evolution interactions at various levels of the biological hierarchy from molecules to ecosystems However we are still lacking a comprehensive understanding of the molecular mechanisms shaping phenotypic

landscapes in the natural environment and under different global change scenarios To address such challenges a new strategic program was also launched by the European Molecular Biology Laboratory EMBL Molecules to Ecosystems to study life in context and provide new research avenues in molecular life sciences In this context the emerging disciplines of Marine Omics and Marine Systems Biology will be key to supporting innovative solutions in marine ecosystem conservation and blue bioeconomy for example uncover molecular traits underlying sensitivity tolerance to environmental change supporting assisted evolution approaches molecular targets that can be used for diagnostics monitoring and development of biotechnological applications      *General Technical Report RMRS* ,1998      **Study Guide for Psychology in Everyday Life** David G.
