Literature 1988, Part 2 Astronomisches Rechen-Institut,2013-06-29 From the reviews Astronomy and Astrophysics Abstracts has appeared in semi annual volumes since 1969 and it has already become one of the fundamental publications in the fields of astronomy astrophysics and neighbouring sciences It is the most important English language abstracting journal in the mentioned branches The abstracts are classified under more than a hundred subject categories thus permitting a quick survey of the whole extended material The AAA is a valuable and important publication for all students and scientists working in the fields of astronomy and related sciences As such it represents a necessary ingredient of any astronomical library all over the world Space Science Reviews 1 Dividing the whole field plus related subjects into 108 categories each work is numbered and most are accompanied by brief abstracts Fairly comprehensive cross referencing links relevant papers to more than one category and exhaustive author and subject indices are to be found at the back making the catalogues easy to use The series appears to be so complete in its coverage and always less than a year out of date that I shall certainly have to make a little more space on those shelves for future volumes The Observatory Magazine 2 *Outer Planets* Natalya Karpova,2024-09-17 Get ready for a visit to the outer limits of the solar system This low level nonfiction title uses narrative text and playful illustrations to introduce young readers to the ice and gas giants of the solar system Students can learn about Jupiter s Great Red Spot and Saturn s rings Bonus facts add even more information while questions encourage readers to think creatively about the text This exciting space voyage will engage young students on their own reading journey

Quantization and Discretization at Large Scales Florentin Smarandache,Victor Christianto,P. Pintr ,2012-01-01 This book is a compilation of research papers discussing the quantization of planetary distances in our solar system and other extrasolar systems It explores the relationship between the distance of planets and their stars and various formulas that suggest there is a reason to accept the quantization of these distances The book also investigates the connection between cosmology and condensed matter systems theorizing that the quantization of orbits could be caused by superfluid helium quantization Additionally it introduces new research trends related to superluminal physics and instantaneous physics
