**Climate Change 2014 - Impacts, Adaptation and Vulnerability: Part B: Regional Aspects: Volume 2, Regional Aspects** Intergovernmental Panel on Climate Change (IPCC),2014-12-29 This latest Fifth Assessment Report of the Intergovernmental Panel on Climate Change IPCC will again form the standard reference for all those concerned with climate change and its consequences including students researchers and policy makers in environmental science meteorology climatology biology ecology atmospheric chemistry and environmental policy Agricultural and Climate Change Adaptation Law in Africa Habib Sani Usman,2025-02-17 This book presents an analysis of climate change and agricultural laws in Kenya Nigeria and South Africa in order to determine whether they adequately addressed the concept of agricultural adaptation Agriculture is one of the sectors of the economy that is contributing to climate change and at the same time the sector is heavily impacted by climate change Therefore agricultural adaptation is required Focusing on three countries this book provides a novel comparative examination of how and to what extent the law promotes agriculture focused adaptation in these countries The role of the law in addressing issues such as water management strategies soil conservation methods and crop production methods is discussed This book identifies gaps in the regulatory frameworks for agricultural adaptation and highlights the lack of adaptive capacity of African agriculture due to weak or non existing legal frameworks It discusses ways to remedy these gaps through specific on farm adaptation strategies legislative amendments to consolidate all relevant national climate change related policies and laws with agricultural policies and laws that have relevant provisions on adaptation as medium term solutions and the development of a specific framework law for agriculture focused adaptation incorporating essential agricultural adaptation strategies could perhaps be enacted as long term solutions to the regulatory gaps This book will be of great interest to students and scholars of law climate change food and agriculture sustainable development and African studies *Climate Change 2014 - Impacts, Adaptation and Vulnerability: Regional Aspects* Christopher B. Field,Vicente R. Barros,2014-12-29 This latest Fifth Assessment Report of the Intergovernmental Panel on Climate Change IPCC will again form the standard reference for all those concerned with climate change and its consequences including students researchers and policy makers in environmental science meteorology climatology biology ecology atmospheric chemistry and environmental policy **Climate Change, Disasters and People on the Move** Aylin Yildiz Noorda,2022-11-07 The open access publication of this book has been published with the support of the Swiss National Science Foundation Climate change is forcing us to consider the right of people to leave their disappearing homelands and the shape this right should take Climate Change Disasters and People on the Move proposes international protection as a solution with three pillars granting protection against return to the country of origin non refoulement preventing future displacement and facilitating safe orderly and regular migration in the context of disasters and climate change Dr Aylin Yildiz Noorda uses the theories of common concern of humankind and community interests to operationalise her proposal providing

a blueprint for future claims      **Climate Change For Dummies** Elizabeth May, John Kidder, 2022-03-31 Get clear about why climate change is so complicated and discover how you can help reverse it More and more frequent extreme weather events occur each year and planet Earth is in danger of developing more climates where life whether animal vegetable or human is unsustainable Climate Change For Dummies explains how rising temperatures shrinking lakes rising oceans and shifting weather patterns affect your life on a daily basis And of course the book goes a step further and offers suggestions about how you can take steps to limit your impact on the environment and help to reverse climate change This straightforward guide demystifies the impact of climate s No 1 enemy carbon dioxide and breaks down the many sources of this damaging but inescapable gas From there the book reveals how rising CO2 levels affect the weather water levels plant and animal species around the world the food you eat and your health But the situation isn t hopeless Climate Change For Dummies outlines actions governments industries and you can take to fight global warming and turn the tide to live in a cooler world Discover details about Short and long term effects of climate change How some actions contribute to climate change and others reduce it The many options for renewable energy and the pros and cons of nuclear energy Actions nongovernmental organizations NGOs are taking to draw attention to the climate crisis The debate around whether climate change even needs to be addressed Climate change won t be easy to overcome but when you re armed with the facts you can do your best to make a difference Let Climate Change For Dummies point you in the right direction      International Investment Law Reform Obiajunwa Ama, 2025-03-11 This book offers contemporary assessment of the challenges facing international investment law and proposes innovative solutions for reform The most controversial issue in international investment law is on the settlement of investor state disputes and its implications on national regulatory autonomy This book recognises that current literature in international investment law fails to adequately incorporate diverse perspectives Therefore it interrogates the United Nations Sustainable Development Goals and their relationship with international investment policies of developing countries particularly in Africa where there has been a marked increase in investor state disputes Despite existing reform proposals by the UNCITRAL Working Group III and emerging progressive treaty drafting practices around the world there remains a need for further clarity on how the world should proceed in reforming and restructuring international investment law and policy This book contributes to existing body of research knowledge by presenting new evidence and proposing practical solutions to enhancing the regulation of international investments and promotion of sustainable development It will inform a range of stakeholders including investors civil society organisations States students and international organisations such as the World Bank      **Anthropology and Climate Change** Susan A. Crate, Mark Nuttall, 2016-03-31 The first edition of Anthropology and Climate Change 2009 pioneered the study of climate change through the lens of anthropology covering the relation between human cultures and the environment from prehistoric times to the present This second heavily revised edition brings the material on this rapidly changing field completely up to date

with major scholars from around the world mapping out trajectories of research and issuing specific calls for action The new edition introduces new foundational chapters laying out what anthropologists know about climate change today new theoretical and practical perspectives insights gleaned from sociology and international efforts to study and curb climate change making the volume a perfect introductory textbook presents a series of case studies both new case studies and old ones updated and viewed with fresh eyes with the specific purpose of assessing climate trends provides a close look at how climate change is affecting livelihoods especially in the context of economic globalization and the migration of youth from rural to urban areas expands coverage to England the Amazon the Marshall Islands Tanzania and Ethiopia re examines the conclusions and recommendations of the first volume refining our knowledge of what we do and do not know about climate change and what we can do to adapt Climate Change 2014 - Impacts, Adaptation and Vulnerability: Part A: Global and Sectoral Aspects: Volume 1, Global and Sectoral Aspects Intergovernmental Panel on Climate Change (IPCC),2014-12-29 This latest Fifth Assessment Report of the Intergovernmental Panel on Climate Change IPCC will again form the standard reference for all those concerned with climate change and its consequences including students researchers and policy makers in environmental science meteorology climatology biology ecology atmospheric chemistry and environmental policy

**Climate Change** A Barrie Pittock,2009-03-31 It is widely accepted in the scientific community that climate change is a reality and that changes are happening with increasing rapidity In this second edition leading climate researcher Barrie Pittock revisits the effects that global warming is having on our planet in light of ever evolving scientific research Presenting all sides of the arguments about the science and possible remedies Pittock examines the latest analyses of climate change such as new and alarming observations regarding Arctic sea ice the recently published IPCC Fourth Assessment Report and the policies of the new Australian Government and how they affect the implementation of climate change initiatives New material focuses on massive investments in large scale renewables such as the kind being taken up in California as well as many smaller scale activities in individual homes and businesses which are being driven by both regulatory and market mechanisms The book includes extensive endnotes with links to ongoing and updated information as well as some new illustrations While the message is clear that climate change is here and in some areas might already be having disastrous effects there is still hope for the future and the ideas presented here will inspire people to take action Climate Change The Science Impacts and Solutions is an important reference for students in environmental or social sciences policy makers and people who are genuinely concerned about the future of our environment *The Regional Impacts of Climate Change* Intergovernmental Panel on Climate Change. **Engineering for Extremes** Mark G. Stewart,David V. Rosowsky,2021-12-16 The volume explains how risk and decision making analytics can be applied to the wicked problem of protecting infrastructure and society from extreme events There is increasing research that takes into account the risks associated with the timing and severity of extreme events in engineering

to reduce the vulnerability or increase the resiliency of infrastructure Engineering for extremes is defined as measures taken to reduce the vulnerability or increase the resiliency of built infrastructure to climate change hurricanes storms floods earthquakes heat waves fires and malevolent and abnormal events that include terrorism gas explosions vehicle impact and vehicle overload The book introduces the key concepts needed to assess the economic and social well being risks costs and benefits of infrastructure to extreme events This includes hazard modelling likelihood and severity infrastructure vulnerability resilience or exposure likelihood and extent of damage social and economic loss models risk reduction from protective measures and decision theory cost benefit and utility analyses Case studies authored by experts from around the world describe the practical aspects of risk assessment when deciding on the most cost efficient measures to reduce infrastructure vulnerability to extreme events for housing buildings bridges roads tunnels pipelines and electricity infrastructure in the developed and developing worlds **Confronting Global Climate Change** Mark Harris,2019-06-07

This book offers a solutions based approach to climate change problems which potentially impinge on human beings within the tropics It largely comprises research articles with supplementary applications and illustrations The effects of atmospheric phenomena energy acquisition wind power CO2 sequestration are linked with soils aquatic life reducing deforestation rainwater harvesting and clay pot farming climate plant disease and food security to show that no area of life is untouched by the phenomenon of climate change It discusses specific problem areas and provides an overview of geotechnical and sustainable solutions to lessen the impact of climate The Three Ages of Water Peter Gleick,2023-06-13 A revelatory

account of how water has shaped the course of human life and history and a positive vision of what the future can hold if we act now From the very creation of the planet billions of years ago to the present day water has always been central to existence on Earth And since long before the legendary Great Flood it has been a defining force in the story of humanity In The Three Ages of Water Peter Gleick guides us through the long fraught history of our relationship to this precious resource Water has shaped civilizations and empires and driven centuries of advances in science and technology from agriculture to aqueducts steam power to space exploration and progress in health and medicine But the achievements that have propelled humanity forward also brought consequences including unsustainable water use ecological destruction and global climate change that now threaten to send us into a new dark age We must change our ways and quickly to usher in a new age of water for the benefit of everyone Drawing from the lessons of our past Gleick charts a visionary path toward a sustainable future for water and the planet Making and Changing Law in Small Jurisdictions Caroline Morris,2024-03-12 This book

puts the spotlight on a different and neglected aspect of law drafting and reform the question of size Specifically how does the size of a jurisdiction affect its ability to make and change its laws Some of the challenges affecting small jurisdictions include a lack of resources and paucity of policy drafting capacity the pressures and pull from sources outside the jurisdiction e g international bodies or NGOs larger states treaty commitments a vulnerability to domestic capture e g criminal elements

big local businesses strong domestic lobby groups weak bad governance e.g. laws or institutions which themselves do not encourage or promote good governance reflection and reform the legacy of colonial legal systems and their interaction with indigenous or customary laws and struggles to comply with constitutional norms such as accountability and transparency Despite these difficulties small jurisdictions also have certain advantages when it comes to making and reforming law they can be flexible and creative they can legislate very quickly if the political will is there and there is strong informal formal accountability in a small jurisdiction This edited collection explores law reform and law drafting in small jurisdictions through the themes of sovereignty the impact of colonialism and legal plurality the challenges of harmonising laws at regional and international levels and constitutional reform Of use to researchers and practitioners alike **THE CLIMATE**

**PHENOMENON** Patrick K. Kalifungwa, 2024-11-13 Climatology or climate science is the scientific study of Earth's climate typically defined as weather conditions averaged over a period of at least 30 years Climate Glossary Climate concerns the atmospheric condition during an extended to indefinite period weather is the condition of the atmosphere during a relative brief period The main topics of research are the study of climate variability mechanisms of climate changes and modern climate change drought unl.edu 2017 Way back 2006 This topic of study is regarded as part of the atmospheric sciences and a subdivision of physical geography which is one of the Earth sciences Climatology includes some aspects of oceanography and biogeochemistry The main methods employed by climatologists are the analysis of observations and modelling of the physical processes that determine climate Short term weather forecasting can be interpreted in terms of knowledge of longer term phenomena of climate for instance climatic cycles such as the El Niño Southern Oscillation ENSO the Madden Julian oscillation MJO the North Atlantic oscillation NAO the Arctic oscillation AO the Pacific decadal oscillation PDO and the Interdecadal Pacific Oscillation IPO Climate models are used for a variety of purposes from studying the dynamics of the weather and climate system to predictions of future climate drought unl.edu 2017 *History and Climate Change* Neville

Brown, 2005-06-29 This book is a balanced and comprehensive overview of the links between climate and man's advance from pre history to modern times It is a synthesis of the many historical and scientific theories regarding man's progress through the ages **Prisoners of Reason** S. M. Amadae, 2016-01-14 Using the theory of Prisoner's Dilemma Prisoners of Reason

explores how neoliberalism departs from classic liberalism and how it rests on game theory **United States Code** United States, 2018 Regulatory Support for Off-Grid Renewable Electricity Ngozi Chinwa Ole, Eduardo G. Pereira, Peter Kayode

Oniemola, Gustavo Kaercher Loureiro, 2023-02-02 This book investigates the role of law in enabling and addressing the barriers to the development of off grid renewable electricity OGRE The limited development of OGRE is ascribed to a host of social economic and legal barriers including the problem of initial capital costs existing subsidies for conventional electricity and lack of technological and institutional capacity Through the analyses of selected case studies from Africa Asia Europe and North and South America this book discusses the typical barriers to the development of OGRE from a global perspective

and examines the role of the law in addressing them Drawing together the lessons learnt from the case studies this book offers robust recommendations on how the development of OGRE will support the goal of achieving universal access to low carbon reliable and sustainable electricity globally This volume will be of great interest to students scholars policy makers investors and practitioners in the fields of energy law and policy climate change and renewable energy development
