

AMAZING ANTS

If you've ever seen a stream of ants marching through your home, you've probably just thought of them as pests to get rid of. Consider for a moment that ants are masters of teamwork. These busy little insects have much to teach us about how animals can work together.

Ants live in communities called **colonies**. All the ants in a colony take care of each other, and they all have special jobs. Most of them are worker ants. Some workers clean and feed the queen, which lays all the eggs. Other workers care for the eggs and the larvae. Many worker ants go out each day to collect food. Others stay home and take care of or enlarge the colony's living quarters.

In some colonies, worker ants are farmers. They carve out an enormous underground colony, where they farm fungi for the community to eat. Farmer ants have one of three jobs. The leaf cutters carry chunks of leaves back to the colony. Then chewers grind the leaves into a yellow paste. A third group spreads the paste inside the colony's underground rooms. The paste fertilizes the fungi and helps them grow. The ants take good care of their crop to keep their food supply growing.

In other colonies, worker ants are herders. They take care of aphids, which are insects that provide another food source for ants. Herders shelter aphid eggs in winter and take the hatched aphids to plants when the weather gets warmer. Then they milk the aphids by stroking their sides.

Worker ants carve out large underground colonies that contain many subterranean rooms.
