research in all subjects and among different philosophical paradigms research methodologies form one of the key issues to rely on. This volume brings a series of papers together which present different research methodologies as applied in supply chain management. This comprises review oriented papers that look at what kind of methodologies have been applied as well as methodological papers discussing new developments needed to successfully conduct research in supply chain management. The third group is made up of applications of the respective methodologies which serve as examples on how the different methodological approaches can be applied. All papers have undergone a review process to ensure their quality. Therefore we hope that this book will serve as a valid source for current and future researchers in the field. While the workshop on Research Methodologies in Supply Chain Management took place at the Supply Chain Management Center Carl von Ossietzky University in Oldenburg, Germany, it is based on a collaboration with the Supply Chain Management Group of the Department of Operations Management at the Copenhagen Business School and the Department of Production Management at the Vienna University of Economics and Business Administration. We would like to thank all those who contributed to the workshop and this book.
