Sample Tender Document For Building Redevelopment:

Consumption and Development Jeffrey James, 1993-03-09 *Facilities Planning And Design: An Introduction For Facility Planners, Facility Project Managers And Facility Managers (Second Edition)* Jonathan Khin Ming Lian, 2022-12-28

This book focuses on the ten essentials of facilities planning and design. It covers topics such as strategic planning, space standards, architectural programming, site selection, master planning, environmental planning, capital improvement planning, workplace planning and design, and space management. Examples will be drawn from the planning and design of airports and universities, which are large organisations with extensive campuses and are asset heavy in terms of buildings. This second edition has been extensively updated with current and new examples, case studies, and references. By learning about the planning and design processes as it relates to facilities, students and facility professionals will be able to align facilities planning and design with the organisation's strategic priorities, manage design consultants by understanding the planning and design process, manage the planning and design of spaces at different scales, and manage the use of existing space effectively. The book is designed such that its chapters may be read either sequentially or as individual standalone references or resources for specific aspects of facility planning, management, and design.

Handbook on Building Control in Hong Kong Wong Wah Sang, Yeung Tse Ngok, 2020-09-21

What is particular of Hong Kong architecture and why is this book written? High-rise buildings constructed next to each other are a common scene in Hong Kong. On the street level, buildings are uninterruptedly connected to the pedestrian pavement. Hence, there have been remarks that such have formed a concrete jungle. This is a result of limited space for the built environment to cater for millions of people to live. As one of the most densely populated modern cities in the world, the buildings in Hong Kong are controlled through legislation of buildings and land to allow reasonable living standards for inhabitants as well as a fair opportunity for private commercial projects to develop relating to their context.

Code of Practice for Project Management for Construction and Development CIOB (The Chartered Institute of Building), 2014-07-23

The first edition of the Code of Practice for Project Management for Construction and Development published in 1992 was groundbreaking in many ways. Now in its fifth edition, prepared by a multi-institute task force coordinated by the CIOB and including representatives from RICS, RIBA, ICE, APM, and CIC, it continues to be the authoritative guide and reference to the principles and practice of project management in construction and development. Good project management in construction relies on balancing the key constraints of time, quality, and cost in the context of building functionality and the requirements for sustainability within the built environment. Thoroughly updated and restructured to reflect the challenges that the industry faces today, this edition continues to drive forward the practice of construction project management. The principles of strategic planning, detailed programming, and monitoring, resource allocation, and effective risk management, widely used on projects of all sizes and complexity, are all fully covered. The integration of Building Information Modelling at each stage of the project life is a feature of this edition. In addition, the

impact of trends and developments such as the internationalisation of construction projects and the drive for sustainability are discussed in context Code of Practice will be of particular value to clients project management professionals and students of construction as well as to the wider construction and development industries Much of the information will also be relevant to project management professionals operating in other commercial spheres

Procurement of Goods, Works and Services in Development Projects Joseph Martial Ribeiro, 2009-06

Arts Development in Community Health Mike White, 2009 Arts in community health is a distinct area of activity that is characterised by the use of participatory arts to promote health Based on the latest international research this book considers how and why arts in community health has come about the characteristics of its practice and the challenges it poses for evaluation The rapid growth of this field of work in the UK from the mid 1990s has begun to impact on policy in the arts funding system on multi sector partnerships for health service delivery and in local authority cultural strategies yet the reasons for its emergence and the nature and diversity of the practice itself have gone largely unaccounted for It encompasses work in primary care community health and public health Arts in community health has not evolved simply as a result of the successful advocacy of an arts sector keen to demonstrate its relevance to health but rather through the wider recognition of a phenomenological connection between engagement in cultural activity and well being The pioneering viewpoints in this book promote an holistic approach to arts and public health focusing on the development of the person and not just the sick or dysfunctional part of that person Alongside the therapeutic benefits to patients the book also considers environmental improvements to support staff and using the arts to produce more creative kinds of health information This fully referenced guide compares and contrasts the arts in different cultures and healthcare systems how well it works why it works and the factors that determine its success The case studies examined prove shared creativity aids public health and simultaneously identifies and addresses the local and specific health needs in a community In the last decade health has become a recurrent topic in discussion of the role of the arts in society fuelled by a growing body of research into connections between culture and well being This pioneering practice of arts in community health began in the UK in the late 1980s through sporadic pilot projects placing local arts development in health promotion and primary care contexts It has since grown and expanded to embrace community health on a broad front hooking up with multi agency initiatives to address the social determinants of health through partnership working Mike White in the Introduction
