<b>Lesson Title:</b>	Industrial Revolution Tic TacToe
<b>Grade Level(s):</b>	Grade 9
<b>Content Area(s):</b>	World History, and Technology are the focus, but students will also learn about Science, Math, English, Art and Economics
<b>Learning Context:</b> <i>What is the context in which this lesson occurs in your curriculum?</i>	<p>In World Civilizations the students are beginning to study the Industrial Revolution, and they have been discussing social inequality related to modern industrialization, analyzing business practices and public health programs of that era. Students will also compare the Industrial Revolution to modern industrialization to gain a better understanding of the global economy, global social inequalities and an awareness of how industrialization relates to many aspects of society.</p> <p>This project addresses and integrates content from the core subjects of world civilizations Geography, English, Art, Mathematics, Economics, History, and Science.</p> <p>We integrate these subjects through the project options offered to students. Students complete three different tasks in this learning activity to encourage students to learn about a variety of aspects of life during the Industrial Revolution including business practices, politics, social change, and culture.</p> <p>The "Industrial Revolution Project Guide" below defines the interrelated tasks students can choose from.</p> <p>In their Keystone class students are learning about different software applications.</p>
<b>Student Task Description</b> <i>What real or simulated problem situation will students address? What useful product(s), event(s), or service(s) will students produce? What audience might benefit from the students' work?(Write to a student audience)</i>	
<p>Example of one student task: Creative Writing.</p> <p><i>Imagine that you are living during the early years of the Industrial Revolution. Choose to be one of the following: a factory worker, a child laborer, or a working class mother. Write a series of diary entries (at least five) in the role of your assumed character. Be sure to record the events of your day and include specific details about your life. You should include not only activities and observations, but also your feelings and emotions.</i></p>

## **Tci The Industrial Revolution:**

The Industrial Revolution in America Kevin Hillstrom, Laurie Collier Hillstrom, 2007-02-22 This three volume set concludes ABC CLIO's groundbreaking series on the Industrial Revolution as it played out in the United States offering volumes on the communications industry and the agriculture and meatpacking industries plus a concluding overview volume on the causes, courses and interconnections among the industries that brought such dramatic change to our lives. The concluding three volume set in ABC CLIO's landmark Industrial Revolution in America series offers vivid reminders of how this economic renaissance changed virtually every facet of American life. Communications takes readers from the telegraph to the telephone and beyond showing how improvements in communication aided by better transportation helped create a truly national marketplace. Agriculture and Meatpacking details the shift of agriculture from family farms and local trade to mass production and agribusiness, sparking the development of a full range of farm machinery and spawning the rise of a new metropolis practically overnight. The concluding Overview Comparison volume looks at the Industrial Revolution as a whole, revealing the impact of various industries on each other and gauging the revolution's broader social and political legacy in the United States and around the world.

The Industrial Revolution in America: Communications Kevin Hillstrom, Laurie Collier Hillstrom, 2007 Communications takes readers from the telegraph to the telephone and beyond showing how improvements in communication aided by better transportation helped create a truly national marketplace. Publisher description: *A Russian Factory Enters the Market Economy* Claudio Morrison, 2007-09-22 This book charts the experiences of a textile enterprise in Russia during the 1990s, analysing post-Soviet management and managerial practices in order to illuminate the content, nature and direction of industrial restructuring in the Russian privatised sector during the years of economic transition. Based on extensive factory level fieldwork, it focuses upon changes in ownership, management and labour organisation, unveiling the complex texture of social, communal and gender relations in the workplace over an extended period of time, including through crisis and bankruptcy, acquisition by new capitalist owners and attempted restructuring. It argues contrary to dominant Western managerial theories which blame the failure of transition on the irrationality of Russian managerial strategies that the rationale for the continued reliance on Soviet era managerial practices lay in the peculiar form of social relations in the workplace which were characteristic of the Soviet system. It engages with key issues often neglected in the literature such as social domination, power and conflict that capture the problematic and open-ended character of social and economic transformation in post-Soviet production. It demonstrates that far from a simple transition to a market economy, the post-Soviet transition has reproduced most of the features of the old Soviet system, including its patterns of labour relations.
