**Universities in Africa** Cloete, Nico, Bunting, Ian, 2018-11-09 From the early 2000s a new discourse emerged in Africa and the international donor community that higher education was important for development in Africa Within this zeitgeist of converging interests a range of agencies agreed that a different collaborative approach to linking higher education to development was necessary This led to the establishment of the Higher Education Research and Advocacy Network in Africa Herana to concentrate on research and advocacy about the possible role and contribution of universities to development in Africa This book is the final publication to emerge from the Herana project The project has also published more than 100 articles chapters reports manuals and datasets and many presentations have been delivered to share insights gained from the work done by Herana Given its prolific dissemination it seems reasonable to ask whether this fourth and final publication will offer the reader anything new This book is certainly different from previous publications in several respects First it is the only book to include an analysis of eight African universities based on the full 15 years of empirical data collected by the project Second previous books and reports were published mid project This book has benefited from an extended gestation period allowing the authors and contributors to reflect on the project without the distractions associated with managing and participating in a large scale project For the first time some of those who have been involved in Herana since its inception have had the opportunity to at least make an attempt to see part of the wood for the trees Different does not necessarily mean new An emphasis on the newness of the data and perspectives presented in this book is important because it shows that it is more than a historical record of a donor funded project Rather each chapter in this book brings to a lesser or greater extent something new to our understanding of universities research and development in Africa **Performed**

**Determining the College Football Playoff: Weighted Wins, A Better Approach** Ray D. Theis,Mark G. Terwilliger,2021-09-21 In this book we explore the history of college football and in particular the mythical college championship from 1869 to the present day For several years different media outlets took it upon themselves to declare a national championship which led to nothing short of confusion In one year four different teams were named champion This chaotic situation and accompanying controversy ultimately led to the creation of the Bowl Championship Series or BCS Initially the BCS selection was based on a formula that incorporated

several polls and computer models. However, the proprietary nature of the computer models and the complexity of the mathematics used to combine the data sources to arrive at the final selection did very little to quiet the controversy. This led to the creation of a selection committee to choose the four best teams to compete in a four team playoff. Again, controversy has ensued with many questioning the politics and nebulous capricious nature of the criteria. We have created an alternate model which we have dubbed the weighted wins system that defines a simple unbiased and consistent mechanism for evaluating and comparing the records of the teams in the NCAA's Bowl Subdivision. We have compared the results of the weighted wins model against forty years of actual game results and found that it generates very similar outcomes. The primary difference is that it completely removes politics from the selection process and offers a clear path to the playoffs for all members of the Bowl Subdivision.

**Global Development of the Community College Model** Carmen L.

McCrink, Heidi Whitford, Natasha C. Stubbs, 2017-03-13 While the community college is a longstanding institutional type within the U.S., the success of this model has recently garnered international attention. As countries outside the U.S. grapple with issues regarding access and affordability of higher education opportunity, the concept of the community college has gained traction. This issue explores the global expansion and development of the community college model in various countries and regions around the world. Insights into the establishment and sustainability of these institutions in other countries through research and analysis and case studies that focus on the development and implementation process of community colleges amid various social, political, and economic contexts. This is the 177th volume of the Jossey-Bass quarterly report series *Essential* to the professional libraries of presidents, vice presidents, deans, and other leaders in today's open-door institutions. *New Directions for Community Colleges* provides expert guidance in meeting the challenges of their distinctive and expanding educational mission.

**Taiwan's Green Parties** Dafydd Fell, 2021-03-15 Examining the Green Party Taiwan (GPT) since its establishment through the aftermath of the most recent national elections in January 2020, this book focuses on Taiwan's most important movement party over the last two and a half decades. Despite its limited electoral impact, its leaders have played a critical role in a range of social movements, including anti-nuclear and LGBT rights campaigns. Plotting the party's evolution in electoral politics as well as its engagement with the global green movement, this volume analyses key patterns of party change in electoral campaign, appeals, organisation, and its human face. The second half of the volume concentrates on explaining both the party's electoral impact and why the party has adjusted ideologically and organisationally over time. Based on a wide range of material collected, including focus groups, interviews, and political communication data, the research relies heavily on analysis of campaign material and the voices of party activists and also considers other Green Parties such as the Splinter Trees Party and GPT Social Democratic Alliance. Applying a wide range of theoretical frameworks to plot and explain small party development, this book will appeal both to students and scholars of Taiwan's politics and civil society but also to readers with an interest in small parties and particularly environmental parties.
