Tea World History Teks:

The Patchwork of World History in Texas High Schools Stephen Jackson, 2022-11-30 This book traces the historical development of the World History course as it has been taught in high school classrooms in Texas a populous and nationally influential state over the last hundred years Arguing that the course is a result of a patchwork of competing groups and ideas that have intersected over the past century with each new framework patched over but never completely erased or replaced the author crucially examines themes of imperialism Eurocentrism and nationalism in both textbooks and the curriculum more broadly The first part of the book presents an overview of the World History course supported by numerical analysis of textbook content and public documents while the second focuses on the depiction of non Western peoples and persistent narratives of Eurocentrism and nationalism It ultimately offers that a more global accurate and balanced curriculum is possible despite the tension between the ideas of professional world historians who often de center the nation state in their quest for a truly global approach to the subject and the historical core rationale of state sponsored education in the United States to produce loyal citizens Offering a new conceptual understanding of how colonial themes in World History curriculum have been dealt with in the past and are now engaged with in contemporary times it provides essential context for scholars and educators with interests in the history of education curriculum studies and the teaching of World History in the United States

Neoliberalizing Educational Reform Keith M. Sturges, 2015-02-27 In this era when commonsense in educational discourse is so deeply framed by neoliberalism we must better understand both the uniquely situated and the insidiously interconnected nature of so called reforms Thank you to Keith M Sturges and colleagues for illuminating exactly this in their important and hard hitting new book that reveals not merely how neoliberal reforms are designed to reinforce inequity but also how the contradictions within provide ample opportunity to collectivize and act with hope Kevin Kumashiro author of *Bad Teacher How Blaming Teachers Distorts the Bigger Picture* In this important volume editor Keith M Sturges has taken the most useful discussions of neoliberalism and with great precision clarity and utility seen them applied to the education arena Over 13 chapters leading education thinkers lay bare sets of realities that the broader public school administrators and policy makers would do well to fully understand These range from the impact of neoliberal thinking upon chartering parent involvement teacher training school climate funding and more I ll be using the chapters in this text in a variety of ways They ll inform conversations with local state and federal policy makers and inform conversations with school leaders and district leaders I ll also be assigning the text in my graduate seminar on education policy Finally the chapters will inform several lectures in my undergraduate class on *The Promise and Peril of Public Education* What a gem of a volume Kevin Michael Foster Executive Director The Institute for Community University and School Partnerships ICUSP

Politics and the History Curriculum K. Erikson, 2012-05-31 The politicians and pastors who revised the Texas social studies standards made worldwide headlines *Politics and the History Curriculum* sets the debate over the Texas standards within a broad context of

politics religion media and education providing a clear analysis of these events and recommendations for teachers and policy makers

Leaving Latinos Out of History Julio Noboa, 2021-05-30 Despite being the state with perhaps the longest history of Latino presence power and influence Texas has very much under represented Latinos in its schools history curriculum Through an analysis of teaching materials and curriculum goals Noboa investigates the extent to which this significant minority is effectively excluded from American historical narrative

The Whites of Their Eyes Jill Lepore, 2011-08-08 From acclaimed bestselling historian Jill Lepore the story of the American historical mythology embraced by the far right Americans have always put the past to political ends The Union laid claim to the Revolution so did the Confederacy Civil rights leaders said they were the true sons of liberty so did Southern segregationists This book tells the story of the centuries long struggle over the meaning of the nation s founding including the battle waged by the Tea Party Glenn Beck Sarah Palin and evangelical Christians to take back America Jill Lepore Harvard historian and New Yorker staff writer offers a careful and concerned look at American history according to the far right from the rant heard round the world which launched the Tea Party to the Texas School Board s adoption of a social studies curriculum that teaches that the United States was established as a Christian nation Along the way she provides rare insight into the eighteenth century struggle for independence a history of the Revolution from the archives Lepore traces the roots of the far right s reactionary history to the bicentennial in the 1970s when no one could agree on what story a divided nation should tell about its unruly beginnings Behind the Tea Party s Revolution she argues lies a nostalgic and even heartbreaking yearning for an imagined past a time less troubled by ambiguity strife and uncertainty a yearning for an America that never was *The Whites of Their Eyes* reveals that the far right has embraced a narrative about America s founding that is not only a fable but is also finally a variety of fundamentalism anti intellectual antihistorical and dangerously antipluralist In a new afterword Lepore addresses both the recent shift in Tea Party rhetoric from the Revolution to the Constitution and the diminished role of scholars as political commentators over the last half century of public debate

Hijacking History Kathleen Wellman, 2021-08-18 The teaching of history has long been the subject of partisan warfare Religion often plays a prominent role in these debates as secular progressives and conservative Christians disagree over which historical figures are worthy of study how or whether certain events should be portrayed and ultimately how tax dollars should be spent But what about students who are educated outside the public schools either in religious schools or at home How are they learning history and what effect does that have on our democracy *Hijacking History* analyzes the high school world history textbooks produced by the three most influential publishers of Christian educational materials In these books the historian informed by his faith tells the allegedly unbiased story of God s actions as interpreted through the Bible History becomes a weapon to judge and condemn civilizations that do not accept the true God or adopt biblical positions In their treatment of the modern world these texts identify ungodly ideas to be vanquished evolution humanism biblical modernism socialism and climate science among them The judgments found in

these textbooks Kathleen Wellman shows are rooted in the history of American evangelicals and fundamentalists and the battles they fought against the tide of secularism In assuming that God sanctions fundamentalist positions on social political and economic issues students are led to believe that that the ultimate mission of America is to succeed as a nation that advances evangelical Christianity and capitalism throughout the world The Christianity presented in these textbooks is proselytizing intolerant of other religions and non evangelical Christians and unquestionably anchored to the political right As Hijacking History argues the ideas these textbooks promote have significant implications for contemporary debates about religion politics and education and pose a direct challenge to the values of a pluralistic democracy **TEExES 191**

White,2011-07-23 Social education is quite a journey Given the ongoing debate and struggle with defining social education the following is at present a working definition While we resist defining social education we believe that social education emphasizes three areas of study critical pedagogy cultural media studies and social studies education We also stress that education interpreted broadly has the potential to advance social justice Thus emerged social education a lifelong journey for all of us to question to challenge to do and to create Connecting present and past merging current issues with traditional curriculum integrating alternative texts and perspectives empowering and emancipating kids and educators and transforming schools and society the transgressions of social education scream out Dewey Freire Kincheloe Zinn Greene Giroux Apple hooks McLaren Kozol Loewen Said Chomsky even Bob Dylan and many others have provided the impetus May we make them proud The essays within this text demonstrate various journeys in social education They are meant as stories not maps or scripts They are intended to serve as a primer of sorts for those interested in a similar journey Hopefully this can be a meaningful experience for many students educators parents and society as a whole of course Well the journey and struggle continues *Resources in Education* ,1998 **Doing Race in Social Studies** Prentice T. Chandler,2015-07-01 Race and racism are a foundational part of the global and American experience With this idea in mind our social studies classes should reflect this reality Social studies educators often have difficulties teaching about race within the context of their classrooms due to a variety of institutional and personal factors Doing Race in Social Studies Critical Perspectives provides teachers at all levels with research in social studies and critical race theory CRT and specific content ideas for how to teach about race within their social studies classes The chapters in this book serve to fill the gap between the theoretical and the practical as well as help teachers come to a better understanding of how teaching social studies from a CRT perspective can be enacted The chapters included in this volume are written by prominent scholars in the field of social studies and CRT They represent an original melding of CRT concepts with considerations of enacted social studies pedagogy This volume addresses a void in the social studies conversation about race how to think and teach about race within the social science disciplines that comprise the

social studies Given the original nature of this work *Doing Race in Social Studies Critical Perspectives* is a much needed addition to the conversation about race and social studies education *Partial Truths and the Politics of Community* Robin L. Teske, Mary Ann Tétreault, 2003 *Partial Truths and the Politics of Community* considers what happens after feminists succeed in achieving social change or in founding organizations dedicated to accomplishing their personal and social goals This collection of eighteen essays by scholars from the fields of international relations and feminist studies explores the theoretical dilemmas and practical politics of living with raised consciousnesses in worlds of our own making The contributors explore feminisms as dreams of human rights as a cluster of ideologies and as a bounty of social practices set within frameworks for tackling problems in nation building and global governance In essays that illustrate the impact of feminist concerns with the quality of education the contributors offer studies of homeschooling of the education of impoverished girls in rural Mexico of sororities and their relation to female autonomy and of the teaching of prisoners by volunteers in county jails Other contributors call for a greater attention to the ecology of social life viewing society as a complex of individuals bound to one another through webs of transactions and obligations These contributors recount examples from Northern Ireland Poland and the United States in which such webs sometimes support and sometimes strangle efforts to achieve human dignity and autonomy Evaluating progress made in the legal realm other contributors chart the opportunities and limitations of international and domestic law as tools to advance and protect human rights They consider gender discrimination in universities and colleges the United Nations and its mixed record on women s issues and the effects of adding rape to the list of prosecutable war crimes The volume concludes with two works on how feminism supports democratic constructions of science and religion with results that destabilize dominant institutions in both realms
