

EVOLUTION UNIT GUIDE ANSWERS

Recall and Review: Use the videos and your textbook to help you answer the following questions.

Section 10.2

1. Describe the difference between a variation and an adaptation.

| Variation | Adaptation |
|---|--|
| <i>differences in the physical traits of an individual from those of other individuals in the group to which it belongs</i> | <i>feature that allows an organism to better survive and reproduce in its environment: an advantage</i> |

2. Explain why tortoises of the same species look different

They live in different areas and those organisms possess variations that allow them to be most successful in their particular area.

3. List two things Darwin learned from his trip to the Galapagos.

- I. *Organisms within the same species have a lot of variety; those variations may become an adaptation that allows them to better survive and reproduce.*
- II. *Fossil evidence showed species changing over time.*

Section 10.3

4. State the four main principles of natural selection.

1. *Variation*
2. *Overproduction /Competition*
3. *Adaptation*
4. *Descent with modification*

5. Briefly explain how each of the above principles is necessary for natural selection to occur.

In order for there to be a reason for natural selection, there have to be more individuals present than the environment can support. Because of this, there is competition between the organisms. Those with variations that give them an advantage will be more likely to survive and reproduce. Therefore their descendant will inherit those modifications.

Section 10.4

6. Describe the four sources of evidence for evolution upon which Darwin based his ideas on common ancestry.

- A. *Fossil Record*
- B. *Biogeography*
- C. *Developmental (Embryology)*
- D. *Comparative Anatomy*

7. Why are vestigial structures considered critical evidence of evolution? Give an example of a vestigial structure.

Because they are structures that we still possess in our bodies but yet there is little to no function needed for them anymore. An example is the small pelvis found in snakes and whales.

8. Describe the difference between homologous and analogous structures.

Teachers Guide And Answers Evolution:

EVO Teachers Guide Rodger W. Bybee, John Feldman, 2012 In this film you will learn among other things that evolution and religion are indeed compatible ways of looking at the world that Darwin was a creationist before he was an evolutionist and that cooperation is just as important as competition in the struggle for existence From Hummingbird Films website

Cultural Issues: Creation/Evolution and the Bible (Teacher Guide) Ken Ham, 2016-09-06 The vital resource for grading all assignments from the Cultural Issues Creation Evolution and the Bible course which includes Learning answers information and strategies when facing destructive influences found in the workplace or school environments Studying fossils the age of the earth the beginning of life and more in these two volumes focused on points of contention related to the Bible faith and science OVERVIEW This curriculum has been put together to provide the answers to many common objections to biblical worldviews and scriptural authority of the Bible Practical tests are included to strengthen the student's grasp of key concepts and terms while providing critical thinking opportunities to put their knowledge to work Students will learn to apply the Biblical worldview to subjects such as evolution carbon dating Noah's ark and the Flood and dozens more They will discover answers to help know the depths of God's wisdom found in His Word and in His world and why this matters to your life your family and your faith FEATURES The calendar provides lesson planning with clear objectives and the worksheets and tests are all based on the materials provided for the course **Life Science (Teacher Guide)** Dr. Carl Werner, 2018-05-17

Chapter Discussion Question Teachers are encouraged to participate with the student as they complete the discussion questions The purpose of the Chapter Purpose section is to introduce the chapter to the student The Discussion Questions are meant to be thought provoking The student may not know the answers but should answer with their thoughts ideas and knowledge of the subject using sound reasoning and logic They should study the answers and compare them with their own thoughts We recommend the teacher discuss the questions the student's answers and the correct answers with the student This section should not be used for grading purposes DVD Each DVD is watched in its entirety to familiarize the student with each book in the course They will watch it again as a summary as they complete each book Students may also use the DVD for review as needed as they complete each chapter of the course Chapter Worksheets The worksheets are foundational to helping the student learn the material and come to a deeper understanding of the concepts presented Often the student will compare what we should find in the fossil record and in living creatures if evolution were true with what we actually find This comparison clearly shows evolution is an empty theory simply based on the evidence God's Word can be trusted and displayed both in the fossil record and in living creatures Tests and Exams There is a test for each chapter sectional exams and a comprehensive final exam for each book *Resources in Education*, 2001-04 **Teaching Biological Evolution in Higher Education** Brian J.
