

Year: 7	Unit: Chemical Reactions	Lesson: L12 How can we use Chemical Reactions?
Keywords:		
Learning Objectives: <ul style="list-style-type: none"> Students who can use their scientific knowledge to make a bath bomb / fizzy. 		
HSW: 2.1: Practical and enquiry skills. Use a range of scientific methods and techniques to test and develop ideas and explanations. To work safely in the laboratory. APP: AF4 & 5 – Students can identify and manage risks.		
Lesson Activity: Starter: Check student's knowledge of Chemical reactions using the activity on powerpoint. Say how we are going to look at different types of chemical reactions. Do a quick demo on Chemiluminescence and show a light stick. Main Phase: Introduce the aim of the lesson which is to use our knowledge gathered in this topic to make bath bombs. Students are to follow the instructions on the worksheet. The bath bombs can then be packaged up and given as presents to family members (make sure that the family members do not have any allergies to the ingredients – must have label on). Plenary: There are a variety of activities that summarise the whole topic.		
Risk Assessment: You must do your own risk assessment for letting the students take the bath bombs home (read teachers notes). Students must wear goes when preparing these.		
Assessment (inc. APP Opp): APP AF4 & 5: Assessing and managing risks		
Homework: Revise for topic test		
Learning Outcomes: <i>All will:</i> be able to identify the main variables and risks for the practical activity. <i>Most will:</i> be able to identify and manage the risks and successfully make a bath bomb. <i>Some will:</i> be able to add different ingredients to their bath bomb to change the properties.

What does a science teacher need to conduct a leaf safari for students? Where can children safely enjoy hands-on experience with life in an estuary? Selecting resources to teach elementary school science can be confusing and difficult, but few decisions have greater impact on the effectiveness of science teaching. Educators will find a wealth of information and expert guidance to meet this need in *Resources for Teaching Elementary School Science*. A completely revised edition of the best-selling resource guide *Science for Children*, *Resources for Teachers*, this new book is an annotated guide to hands-on, inquiry-centered curriculum materials and sources of help in teaching science from kindergarten through sixth grade. Companion volumes for middle and high school are planned. The guide annotates about 350 curriculum packages describing the activities involved and what students learn. Each annotation lists recommended grade levels, accompanying materials and kits, or suggested equipment and ordering information. These 400 entries were reviewed by both educators and scientists to ensure that they are accurate and current and offer students the opportunity to ask questions and find their own answers. Experiment productively. Develop patience, persistence, and confidence in their own ability to solve real problems. The entries in the curriculum section are grouped by scientific area: Life Science, Earth Science, Physical Science, and Multidisciplinary and Applied Science, and by type: core materials, supplementary materials, and science activity books. Additionally, a section of references for teachers provides annotated listings of books about science and teaching, directories and guides to science trade books and magazines that will help teachers enhance their students' science education. *Resources for Teaching Elementary School Science* also lists, by region and state, about 600 science centers, museums, and zoos where teachers can take students for interactive science experiences. Annotations highlight almost 300 facilities that make significant efforts to help teachers. Another section describes more than 100 organizations from which teachers can obtain more resources. And a section on publishers and suppliers gives names and addresses of sources for materials. The guide will be invaluable to teachers, principals, administrators, teacher trainers, science curriculum specialists, and advocates of hands-on science teaching, and it will be of interest to parent-teacher organizations and parents. **Learning Elementary Chemistry Workbook for Class 8** Dr. R.
