Leatham, 2019-09-12 The purpose of this book is to collect, organize, and disseminate collective wisdom with respect to designing, conducting, and publishing quality research in mathematics education. This wisdom will be gleaned from among those who over the past several decades have been instrumental in guiding the field in the pursuit of excellence in mathematics education research: insightful editors, educative reviewers, prolific writers, and caring mentors. Each chapter is written to the novice researcher with the intent of aiding them in avoiding common pitfalls, navigating difficult intellectual terrain, and understanding that they are not alone in experiencing rejection, frustration, confusion, and doubt. This book differs from existing literature in the sense that it is written about the enterprise of designing, conducting, and publishing research in mathematics education as opposed to being reports of the results of such work. It also differs in the sense that it is written with the intent to mentor the rising generation as opposed to capturing the state of the field as would happen in a handbook, for example. It is written for the express purpose of helping the field work collectively to aid in the often isolated enterprise of mentoring new researchers. The primary audience is a potentially wide one: graduate students, novice researchers, graduate faculty advisors, and mentors, or anyone seeking to improve their own abilities to design, conduct, and publish quality research in mathematics education.      **Unraveling the Seven Myths of Reading** Frank B. May, 2001 Examines myths related to reading and how to minimize them through intervention models, theories, case studies, and assessments.      **Teacher as Curator** Lisa Donovan, Sarah Anderberg, 2020 Increasingly across the country, school district and postsecondary educators are exploring new avenues for incorporating the visual and performing arts into the core curriculum through interdisciplinary learning called arts integration. Arts Integration is a pedagogy whereby students engage in learning subject matter in and through the arts. The Kennedy Center in Washington, D.C., a nationally recognized leader for professional artists and arts education, defines arts integration as an approach to teaching in which students construct and demonstrate understanding through an art form. Teachers engaged in an arts-integrated pedagogy may design lessons through which students act out the lifecycle of a butterfly, dance the structure of DNA, illustrate main ideas in storybooks, or rap mathematical formulas and concepts.      **Guided Inquiry Design®** Carol C.
