

Teaching Philosophy

My teaching philosophy is: "To create *students-techno-centered* ambiance wherein students learn through fun, doing activities, active participation, and a spirit of cooperation and collaboration in the peer group or teamwork to make them autonomous with full sense of pride and confidence."

My teaching practices empower students to realize their full potential by providing opportunities, support, feedback, and guidance to achieve the learning outcomes. I plan various activities based on given curriculum, students' learning styles and real-life situations with an aim for the students to comprehend, engage, practice and construct products to display and reflect on tangible progress and desired results. This enables me to bring about the paradigm shift from rote/memorizing method to widen cognitive skills and think critically and apply it in real-life situations to tackle problems creatively. I, through these classroom practices, endeavor to make the classroom an arena for students to learn, develop and demonstrate the productive and the receptive skills.

We pass through a revolutionary phase of rapid technological advances bringing in new challenges. Today, teachers should not only extend beyond delivering the lecture and passing on information but also go through training, seminars, workshops, and conferences to acquaint, develop, analyze and communicate new knowledge. Mostly, I found the students learn more effectively in informal discussions during office hours and interacting on social media beyond classroom settings. I adopt the co-teaching approach to learning much from my colleagues and students. I still foresee to ongoing teaching, research, training and learning en route from my peers and students to grow and learn new things.

I believe that teaching is not about one individual student, but about hopes, expectations, and aspiration of many students. And when the institution exists to impose faith and empower its teachers with autonomy, good curriculum, evaluation standards, and encouraging environment to teach rather to put obstacles in their path, progress is

Teaching Philosophy Paper:

Teaching Philosophy Statement Umar Aliyu, 2019-08-19 I am delighted to write this book because teachers play a very vital and important role in our life. A good teacher helps us to become good human beings and citizens in our society and the country as a whole. Teachers know that students are the future of any nation so the future development of any nation is in the hands of teachers. There is a core belief behind every educator which is teachers are known to be simply amazing. Teachers inspire people because they impact knowledge and add value to their students' lives and overall these individuals understand the sacrifice and dedication one must make in order to be successful in the lives they touch. The most common role a teacher plays in the classroom is to teach knowledge to children and let us always have it in the back of our minds that it is only in learning you will teach and in teaching you will learn. The most important role of a teacher is to deliver classroom instruction that helps students by ensuring that students experience academic success and through functioning as surrogate parents, mentors and counsellors and even almost politicians since there is almost no limit to the roles a teacher will play. Teachers teach in many ways including lectures, small group activities and hands on learning activities. Therefore to achieve all this there must be some laid down principles that must be followed in order to fully impact the students positively and overall achieve growth and development in the education industry. A typical practice for instructors is to build up a showing logic which causes them to become intelligent specialists all through time on different educating and learning methodologies. A teaching philosophy statement is a narrative that includes your conception of teaching and learning, a description of how you teach and justification for why you teach in a particular way. In other words your teaching philosophy is a self-reflective statement of your beliefs about teaching and learning. It is a one to two page narrative which conveys your core ideas about being an effective teacher in the context of your discipline. The thrust of the paper is to critically analyse what is teaching philosophy and its importance to teachers and the educational sector as a whole. This book will help starting and experienced instructors to improve their teaching abilities by building methods insight and a formative procedure concentrated on the upgrade for learning. According to Aristotle, Those who know do while those that understand teach. I also firmly believe that the most vital and important thing in the world is teaching because the best thing a person can achieve in life is to learn something because it is virtually the only thing which the mind can never overlook, never use up completely, never feel isolated or estranged and will never let you down. This is why Teaching Philosophy is very important to teachers because it enables them to understand the scope and limits of empirical research in education and the relationships between that research and conceptual issues in education thereby making them view and analyse from the perspective of their students. Finally apart from understanding why students are behaving in a particular way with Teaching Philosophy teachers would also be able to know how students perceive their actions. As a model in teaching in High school Colleges or Universities this book peels back the layers of those conceptual issues in teaching worlds and reveals many surprising findings that will

impact you positively because this book has it all If you have found this book useful please consider leaving a short review on Amazon *Values, Philosophies, and Beliefs in TESOL: Making a Statement* Graham Crookes,2009-02-16 This insightful book chronicles the many influences and developments that have helped shape the language teaching profession today
