**Regrouping in Subtraction, Grade 2 Workbook** Maria Miller, 2016-01-01 In Regrouping in Subtraction Grade 2 Workbook we study regrouping in subtraction starting with two digit numbers First students are taught to break 1 ten into 10 ones For example 5 tens 4 ones is written as 4 tens 14 ones one ten gets broken down into 10 ones This is the process of regrouping one of the tens changes groups from being with the tens to being with the ones After students have mastered that then it is time to use regrouping in subtraction problems and learn the traditional way of subtracting in columns the numbers are written under each other Then we study word problems with more and fewer and also several techniques or tricks for mental subtraction The word problems in the chapter require both addition and subtraction I do not like putting only subtraction word problems in a lesson that is about subtraction Students need to practice recognizing whether a problem requires addition or subtraction thus each set of word problems typically includes both kinds After this it is time to study regrouping in subtraction with three digit numbers There are three cases Regrouping 1 ten as 10 ones such as is needful for 546 229 Regrouping 1 hundred as 10 tens such as is needful for 728 441 Regrouping two times 1 ten as 10 ones and 1 hundred as 10 tens such as is needful for 725 448 Regrouping with zero tens such as is needful for 405 278 Here first we regroup 1 hundred as 10 tens then 1 ten as 10 ones In this workbook we ONLY study cases 1 and 2 from the list above Again students first practice the regrouping process with visual models You could use base ten blocks instead At the end of the workbook students encounter bar graphs again They also play Euclid's game which is meant as a fun supplemental lesson You may omit it if time does not allow
