

THE ENDOCRINE SYSTEM

Gland/Endocrine Gland	Function
Hypothalamus	Controls the pituitary gland and releases hormones that regulate the body.
Pituitary Gland	Releases hormones that control the growth and development of the body.
Thyroid Gland	Releases thyroid hormones that regulate the body's metabolism.
Parathyroid Gland	Releases parathyroid hormone that regulates the body's calcium levels.
Adrenal Gland	Releases hormones that regulate the body's stress response.
Testes	Releases testosterone that regulates the body's male sex characteristics.
Ovaries	Releases estrogen that regulates the body's female sex characteristics.

The endocrine system is made up of several glands.

A gland is an organ that produces and releases chemicals.

Some glands, such as endocrine glands, release chemicals into the blood, or they "bleed".

These chemicals then travel through the bloodstream to places in the body called the target organs. Endocrine glands release chemicals directly into the blood.

Koballa (Jr.), Alfred T. Collette**

Teaching The Endocrine System In Middle School:

Teaching Health Science Stephen J. Bender, 1997 Since the last edition of *Teaching Elementary Health Science* much has changed in health education This edition contains the most recent information regarding education and health and the National Health Education Standards Part 1 of this text covers health science foundations including the relationship between education and health the meaning of comprehensive school health curricular approaches learning strategies and instructional accountability Part 2 covers content strategies and skills This text is a beneficial tool for elementary and middle school teachers and students of elementary middle school health education Science Instruction in the Middle and Secondary Schools Alfred T. Collette, Eugene L. Chiappetta, 1989 New edition of a text for preservice and inservice teachers Covers background for science teaching teaching strategies and classroom management planning for instruction assessment and professional development Annotation copyright by Book News Inc Portland OR *Resources in Education*, 2001-04

Resources for Teaching Middle School Science Smithsonian Institution, National Academy of Engineering, National Science Resources Center of the National Academy of Sciences, Institute of Medicine, 1998-04-30 With age appropriate inquiry centered curriculum materials and sound teaching practices middle school science can capture the interest and energy of adolescent students and expand their understanding of the world around them *Resources for Teaching Middle School Science* developed by the National Science Resources Center NSRC is a valuable tool for identifying and selecting effective science curriculum materials that will engage students in grades 6 through 8 The volume describes more than 400 curriculum titles that are aligned with the National Science Education Standards This completely new guide follows on the success of *Resources for Teaching Elementary School Science* the first in the NSRC series of annotated guides to hands on inquiry centered curriculum materials and other resources for science teachers The curriculum materials in the new guide are grouped in five chapters by scientific area Physical Science Life Science Environmental Science Earth and Space Science and Multidisciplinary and Applied Science They are also grouped by type core materials supplementary units and science activity books Each annotation of curriculum material includes a recommended grade level a description of the activities involved and of what students can be expected to learn a list of accompanying materials a reading level and ordering information The curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide The criteria reflect and incorporate goals and principles of the National Science Education Standards The annotations designate the specific content standards on which these curriculum pieces focus In addition to the curriculum chapters the guide contains six chapters of diverse resources that are directly relevant to middle school science Among these is a chapter on educational software and multimedia programs chapters on books about science and teaching directories and guides to science trade books and periodicals for teachers and students Another section features institutional resources One chapter lists about 600 science centers museums and zoos where teachers can take

middle school students for interactive science experiences Another chapter describes nearly 140 professional associations and U S government agencies that offer resources and assistance Authoritative extensive and thoroughly indexed and the only guide of its kind Resources for Teaching Middle School Science will be the most used book on the shelf for science teachers school administrators teacher trainers science curriculum specialists advocates of hands on science teaching and concerned parents

Science Activities for Middle School Students George C. Lorbeer,2000 Science Activities for Middle School Students a revision of George Lorbeer and Leslie Nelson s classic Science Activities for Children gives instructors practical fun hands on learning activities to help teach children about science and problem solving skills Each activity follows the same step by step format Problem Procedure Result Supplemental Information and Thought Questions The activities are accompanied by simple illustrations that help clarify procedures and expected results With a total of nearly 300 activities future science teachers will find a wealth of ideas to help them become more effective in the classroom Science Activities for Middle School Children contains more challenging higher level science activities such as ones about the Greenhouse Effect the Icehouse Effect Ozone Depletion and the Eutrophication of some of our fresh water supplies The text is an excellent and comprehensive resource that future and practicing teachers of elementary science will want to keep at arm s length for ready reference *Middle School Journal* ,1984

Passing the State Science Proficiency Tests Craig A. Wilson,2013-12-05 Passing the State Science Proficiency Tests presents essential content for elementary and middle school teachers who want to improve their science content background enhance their classroom instruction or pass the state science proficiency tests This book addresses different aspects of the physical life and earth sciences Each chapter was written by a science education expert and includes review questions with an accompanying answer key This book will enhance the effectiveness and competency of any pre service or in service elementary or middle school teacher

The Power of the Adolescent Brain Thomas Armstrong,2016-07-12 Moody Reckless Impractical Insecure Distracted These are all words commonly used to describe adolescents But what if we recast these traits in a positive light Teens possess insight passion idealism sensitivity and creativity in abundance all qualities that can make a significant positive contribution to society In this thought provoking book Thomas Armstrong looks at the power and promise of the teenage brain from an empathetic strength based perspective and describes what middle and high school educators can do to make the most of their students potential Thoroughly grounded in current neuroscience research the book explains what we know about how the adolescent brain works and proposes eight essential instructional elements that will help students develop the ability to think make healthy choices regulate their emotions handle social conflict consolidate their identities and learn enough about the world to move into adulthood with dignity and grace Armstrong provides practical strategies and real life examples from schools that illustrate these eight key practices in action In addition you ll find a glossary of brain terms a selection of brain friendly lesson plans across the content areas and a list of resources to support and extend the book s ideas and practices

There is a colossal mismatch between how the adolescent brain has evolved over the millennia and the passive rote learning experiences that are all too common in today's test obsessed educational climate. See the amazing difference in school and beyond when you use the insights from this book to help students tap into the power of their changing brains.
