**Hands-On Math Projects With Real-Life Applications** Judith A. Muschla, Gary R. Muschla, 2006-07-18 Hands On Math Projects with Real Life Applications Second Edition offers an exciting collection of 60 hands on projects to help students in grades 6-12 apply math concepts and skills to solving everyday real life problems. The book is filled with classroom tested projects that emphasize cooperative learning, group sharing, verbalizing concepts and ideas, efficient researching and writing clearly in mathematics and across other subject areas. Each project achieves the goal of helping to build skills in problem solving, critical thinking and decision making and supports an environment in which positive group dynamics flourish. Each of the projects follows the same proven format and includes instructions for the teacher, a Student Guide and one or more reproducible datasheets and worksheets. They all include the elements needed for a successful individual or group learning experience. The projects are easily implemented and can stand alone and they can be used with students of various grade levels and abilities. This thoroughly revised edition of the bestseller includes some new projects as well as fresh information about technology based and e-learning strategies and enhancements. No Child Left Behind standards, innovative teaching suggestions with activities, exercises and standards based objectives, reading and literacy connections and guidelines and objectives for group and team building projects. Hands On Math Projects with Real Life Applications is printed in a lay flat format for easy photocopying and to help you quickly find appropriate projects to meet the diverse needs of your students and it includes a special Skills Index that identifies the skills emphasized in each project. This book will save you time and help you instill in your students a genuine appreciation for the world of mathematics. The projects in this book will enable teachers to broaden their instructional program and provide their students with activities that require the application of math skills to solve real life problems. This book will help students to realize the relevance and scope of mathematics in their lives. Melissa Taylor, middle school mathematics teacher, Point Pleasant Borough, New Jersey.

**The Artisan Teaching Model for Instructional Leadership** Kenneth Baum, David Krulwich, 2016-08-24 The Artisan Teaching Model merges the idea of teamwork with the concept of an artisan apprentice relationship. As in any apprenticeship, newer members of the profession work alongside experts, artisans. As apprentices become more skilled, they take on larger and more substantial roles and continue to work alongside and together with artisans. Over time, the apprentices become artisans themselves and in turn share the art and craft of teaching with newer teachers. Although rubrics and checklists may cue good teaching practices, they do not make great teachers or effective leaders. Teaching is a craft and great teachers must be treated as the artisans they are. It is the intensive collaboration among teachers that helps them develop the broad range of skills they need to become true artisans who know how to help every student achieve. Baum and Krulwich work from this underlying premise and argue that all schools must develop conditions that allow true artisanship to flourish. Baum and Krulwich's Artisan Teaching is a great example of the power of collaboration in schools and should be

widely emulated by those interested in building capacity and improving schools Great ideas for creating a school community based in deep learning that benefits all schools Michael Fullan Professor Emeritus University of Toronto Artisan Teaching puts the emphasis right where it belongs on the home grown teacher led creation and improvement of course curriculum and instruction Baum and Krulwich's book based on the excellent results achieved at their school in the Bronx confirms the unrivaled power of focusing on the right things all the time Mike Schmoker Author of Leading with Focus Baum and Krulwich's system is a powerful and innovative new approach to leadership development within schools The Artisan Teaching Model is both bold and creative and can be implemented successfully in any school in the country It is a must read for anyone
