Turning information into knowledge through reporting and business analytics

Fact sheet

Siemens PLM Software

www.siemens.com/teamcenter

Summary

Teamcenter® software's reporting and analytics solution provides easy-to-use tools that enterprises can integrate into their PLM environment to gain unprecedented visibility into their business processes and Teamcenter-managed data. With the reporting and analytics solution, enterprises can establish an information infrastructure that allows them to quickly generate reports and analyses in a wide variety of formats from graphical dashboard displays to easily accessible HTML formats that can be delivered by email, generated as PDFs or exported to Excel spreadsheets.

Benefits

Provides a common set of reporting and analytic capabilities that you can leverage across Teamcenter and other enterprise applications to ensure consistent, accurate and timely decision support.

Facilitates a total information infrastructure that allows enabled users to view, analyze and report on Teamcenter-managed product and process data.

Simplifies user interaction within this infrastructure by enabling users to issue business queries in a language consistent with Teamcenter's information conventions.

Enables enabled users to collate data from multiple Teamcenter applications and present them for analysis in a single web-browser window.

Unifies your customized Teamcenter object model and security model "as is" – thereby reducing your implementation procedures.

Allows new partners and suppliers to rapidly access and leverage your product and process data.

Enables your enterprise to respond quickly to changing business conditions as new product knowledge can be easily added, deleted or modified from your information infrastructure.

Substantially leveraging Teamcenter investments

Teamcenter's reporting and analytics solution enables enterprises to transform Teamcenter-managed data into actionable knowledge by using simple tools to extract, analyze and report on product and process information. In turn, this knowledge can be used to address numerous business questions.

How production is your current project process? How many documents were delivered on time or were late? What is the change rate of change incorporation? What products have the most reported problems? How are your parts performing? What are the most common failure modes? How do project A and project B compare in terms of their release volumes? What is the current status of supplier performance on project XYZ?

Tightly integrated with Teamcenter and its applications, the reporting and analytics solution fully leverages the entire data object, business and security models of the underlying Teamcenter PLM system, allowing any one to apply reporting and analytic tools to their unique installation.

Teamcenter maximizes an enterprise's ability to work with virtually all kinds of product and process information, including data captured from other enterprise application systems and all relational and legacy data sources. You can use Teamcenter to tie multiple data sources into an enterprise information integration (EII) solution that honors the organization's application security and business conventions.
