

SAMPLE SOP FOR MS IN INFORMATION SYSTEMS

The advent of technology and the internet has greatly enhanced the ability of people to create and share information across the globe. Thanks to efforts for converting records and other information to electronic file format, there is not more data than ever before living in a virtual world. With this large collection of data comes the problems associated with such databases, including storage, accessibility, and security. My studies in computer science have led me to develop a deep interest in further studying the software and hardware integrations that make this data handling possible, and I hope to continue my education in this field through a graduate degree in Information Systems.

During my internship in a data management company last year, I was exposed to many of the elements of information systems studies. I helped to develop a new accessibility portal for clients that would allow them to access their own information in a faster and more secure format, while also employing additional checks on identity to verify that only authorized users had access to essential information. Through this experience, I had the opportunity to learn many relevant programming and troubleshooting skills, applying them to a real-life situation in the industry.

Through this graduate program in Information Systems, I will have the opportunity to continue to hone my computer science skills while also fostering new methods of creative thinking. I look forward to working alongside like-minded colleagues to master challenging concepts and complete industry-relevant projects in preparation for a career in the field. The skills and the knowledge that I will gain from this graduate program in Information Systems will give me the software fluency and the understanding of hardware that I will need to continue to develop as an information systems specialist.
