*Teaching and Learning Language: Current Trends and Practices (Penerbit USM)* Ambigapathy Pandian,Sunny Tan Siew Bek,Shaik Abdul Malik Mohamed Ismail,2014-11-25 This book represents a collection of papers that relate to the challenges and problems posed by the ever changing and diversified nature of today's classroom. The papers discuss and demonstrate methodologies and learning strategies and in the process recommend effective practices that are practical and open to adaptation for different teaching and learning contexts. They range from suggestions on how to exploit information technology resources to individual or specific case studies. These case studies report on a variety of contextual issues and problems that are specified to particular learning contexts. This book therefore thus not only offers examples of tried and tested teaching strategies but also offers useful insights into specific sociocultural problems that are experienced by learners as well as teachers and interested stakeholders in particular settings and countries. The papers offer a comprehensive documentation of past as well as present problems faced by teachers, policy makers and students and discuss ways and strategies of overcoming such problems such that the teaching and learning process is not only enhanced but made more meaningful and fulfilling to both teachers and learners. The inherently global perspective of the papers in this book makes it an enriching compendium.

Science , Language Planning in Primary Schools in Asia Richard Baldauf,Robert

Kaplan,Knonko Kamwangamalu,Pauline Bryant,2013-09-13 In foreign language education decisions must be taken on what languages to teach who will teach them in which schools i.e all only urban only rural in which grades the number of hours a week and the cost involved. This book explores the answers to these questions across a number of Asian polities. It illustrates why some of the efforts undertaken are successful and why some are not why despite significant investments of time and resources some students do not seem to acquire the languages being taught and why some teachers responsible for instruction in the designated foreign languages have problems achieving fluency in the designated language or have other language teaching difficulties. It suggests some strategies various polities might attempt to achieve their stated language learning objectives. This book was originally published as a special issue of Current Issues in Language Planning
