

This activates the electromagnet, 1, which holds the hydrostatic pedal in place.

The cruise control can be disengaged by:

- Depressing both brake pedals.
(Depressing both pedals activates cruise release brake switch).
- Placing the cruise control switch in the "OFF" position.

When either one of the above actions take place, the electric current to the magnet is interrupted, and the hydrostatic pedal returns to neutral.

NOTE: The cruise control can be overridden by pushing on the hydrostatic pedals with enough force to force the linkage past the electromagnet. If the cruise is over ridden, once the force on the pedal is removed the cruise will be set at the new speed position.

NOTE: When the ignition key is turned to the "OFF" position, the cruise control will default to the "OFF" position.

ELECTROMAGNET AIR GAP ADJUSTMENT

With the tractor turned off and the cruise control deactivated, loosen bolts, 1, on magnet mounting plate. Move mounting plate inboard or outboard to obtain an air gap, 4, of 0.5 – 1.5 mm (0.020 – 0.060 in.) between magnet, 2, and pivot plate, 3. Retighten mounting bolts, 1.

NOTE: Troubleshooting cruise control system is cover in section 53 electrical.
