Agricultural Research for Sustainable Food Systems in Sri Lanka Ranjith Premalal De Silva,Gamini
Pushpakumara,Pahan Prasada,Jeevika Weerahewa,2020-10-06 Food systems involve a range of activities concerning food
production processing distribution marketing and trade preparation consumption and disposal They encompass the path of
food from the farm to the dinner table meeting the food and nutritional needs of a nation When such systems do so without
sacrificing the needs of future generations they are referred to as Sustainable Food Systems The natural and physical
environment infrastructure institutions society and culture and policies and regulations within which they operate as well as
the technologies they adopt shape these systems outcomes Making food systems more sustainable is a key priority for all
nations and Sri Lanka is no exception Food systems deliver optimal performance when the policy and regulatory environment
is conducive institutions are supportive and a combination of agricultural research investments and an efficient extension
system generates the technologies and scientific evidence required for sound policymaking and agenda setting Further
agricultural research can generate essential findings technologies and policies for sustainable agricultural development
across disciplines sectors and stakeholder groups This book shares valuable insights into research conducted in the broad
food and agriculture sectors in Sri Lanka It also discusses the status quo in related disciplines and outlines future research
directions Accordingly it offers a valuable source of reference material for researchers students and stakeholders in the food
and agriculture sectors while also highlighting the types of support that policymakers and other decision makers can provide
