

Teacher Guide: Archimedes' Principle

Learning Objectives

Students will:

- Verify that the mass of a floating body is equal to the mass of displaced liquid.
- Qualitatively predict how the forces of a given submerged object change with the size of the object.
- Understand how gravity and the buoyant force influence motion and support of a boat.
- Explain Archimedes' principle.
- Apply Archimedes' principle to fluid situations.

Summary

Archimedes' principle: buoyant force, density, pressure, mass, volume, weight

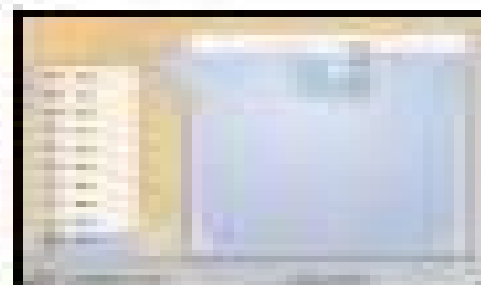

Lesson Overview

How good are students at why a ship floats? How good is their work? One technique involves having them try pushing a block into water and observing whether buoyant force is strong enough to support up to the weight of the submerged principle.

The Archimedes' Principle Demo shows a simple "boat" floating in water. Students can add weights to the boat until the water level reaches the top of the block. In this case, the boat sinks into the liquid, the displaced liquid overflows, and is collected in a beaker. The boat mass is measured, and the mass of the displaced liquid is measured. The boat mass is compared to the mass of the displaced liquid.

The following questions should be asked during the lesson:

- Activity 1: ... Students verify that the mass of a boat is equal to the mass of displaced liquid.
- Activity 2: ... Students determine whether a submerged boat will sink or float.
- Activity 3: ... Students explain how the forces of gravity and buoyancy affect a boat.
- Extension: ... Students explain how a ship floats.

Suggested Lesson Sequence

1. Pre-Demo activity: Predicted outcome ... 10 minutes
Students predict how a boat will float in water. They are given a block of wood and a beaker of water. They are asked to predict whether the block will sink or float. They are then given a beaker of water and a block of wood. They are asked to predict whether the block will sink or float. They are then given a beaker of water and a block of wood. They are asked to predict whether the block will sink or float.
